Highlights

Delivering growth across all business segments

Business model delivering resilient financials, maintaining cash generation profile and discretionary CAPEX

Strong liquidity position, fully funded and flexible debt with low market volatility

ESG integrated in Redexis activities

- New 26k connection points added (+1,1% YoY), including LPG add-ons
- Contracted 1.825 GWh (+11% VS 2021) annualized demand in new industrial and tertiary clients
- Drop in residential volumes (8,0%) in 2H2022 due to high temperatures, industrial volumes flat (ex impact from cogeneration, see page 7) and tertiary volumes drop by 2,3%, under high energy prices
- Revenue growth +2,9% YoY driven by higher LPG gas prices and add-ons
- €170,3m EBITDA, -5,1% YoY due to high temperatures in 4Q2022 and energy context, compensated through growth strategy in most accretive segments and cost management
- Cash conversion above 90% EBITDA, discretionary CAPEX above €100m focused on distribution and LPG add-ons
- Ordinary net result of €28,4m
- Successfully refinancing: new ESG-linked financing of €300m with 6 top international banks to support growth plan
- Solid liquidity position of €456m available, no relevant maturities until 2025
- · Flexible debt structure with 85% fixed-rate debt, minimizing market volatility
- S&P affirmed investment grade rating BBB- outlook stable in September 2022
- Recognition of ESG achievements: upgraded to Advanced on Moody's ESG Solutions and scoring 95 in GRESB rating
- ESG plan integrated in business strategy with positive impact on stakeholders
- New ESG-linked financing, reinforcing Redexis sustainability commitments

Total demand	GWh	36.546	28.893	(20,9%)

(*) Including the last LPG CP acquisitions to be integrated

- Added 26k new gross connection points, vs 28k in 2021 (excl. LPG add-ons), resulting in 9k net connections points added on 2021
- Residential volumes: after a promising 1H2022 +4,4% YoY, demand drop at -8,0% driven by record-high temperatures from October to December
- Growth compensated the drop in tertiary and industrial conventional volumes caused by high energy prices:
 - Tertiary volumes drop of 3,8% despite 10,0% YoY in 1H2022
 - New industrial additions neutralised drop in volumes of industrials client base (0,0% YoY) excluding the transitory decrease on cogeneration users' consumption
- 982 municipalities (including those on integration process) + 91 authorised
- 27 NGV stations developed, added 2 new stations in 2022

Network length (Km)

Operational review

Industrial and tertiary segments

• Tertiary and industrial volumes conditioned by cogeneration effect, high gas price context and unusually high temperatures on 4Q2022

- Industrial energy volumes reached 8.475 GWh, driven by the connection of new industrials, yet affected by the transitory decrease on cogeneration clients' volumes (-17,2% YOY vs sector's -23,3%). Industrial volumes flat (0,0% YoY) excluding cogeneration, as new industrial additions balanced drop on existing clients due to exceptional price levels.
- Tertiary volumes reached 2.522 GWh, -3,8% YOY, under the effect of high temperatures and high gas prices despite 10,0% YoY in 1H2022.
- Strong contracting performance +11% on annualized volumes (YTD,1.825 GWh), maintaining high levels of CP growth

(1) Tertiary includes tariff groups 3.3, 3.4, and industrial 3.5 and G.2(2) Tertiary and industrial base clients considering all tariffs

Operational review Capex

CAPEX breakdown

- Investment deployment of € 109,2m, up 12,8% compared to 2021, mainly focused on distribution growth in high cash conversion segments and LPG acquisitions
- Maintenance capex remains below 5% of total capex
- Intangible capex: execution of remunerated IT projects on transmission digitalisation to improve operational efficiency

Operational review - Energía '26

"Delivering the energy of the future, committed to the progress and well-being of our communities"

Lead gas infrastructure growth	 +3,5% CAGR in connection points in the last 5 years Contributed 51% of sector's net connection point additions in 2022 Industrials: average growth of 660 new connection points p.a. in the last 3 years Biomethane: 130+ injection projects requests, of which 2 under construction (Galivi and Biolvegas) 27 NGV refuelling station network in 11 autonomous communities. Added 2 in 2022 Hydrogen: authorisation of the first H2 pipeline and injection in Spain (Green Hysland) 	
Proactive development of renewable gases	 25+ biomethane project partnerships under study 4 H2 project partnerships: Garray, Hydrogenizing BCN, Green Hysland and Aira H2 Active promotion of renewable gases through R&D consortia: 11+ projects 	R&D
Promotion of energy efficiency	 Supporting tertiary and industrial's energy transition needs Promotion of distributed solar: x5 installed capacity vs 2021 	DIGITALISATION
Strategy	Execution	Enablers

Operational review

Contributing to carbon neutrality through renewable gases and hydrogen

New Aira H ₂	 Project for the generation and distribution of renewable hydrogen in the municipality of Alcalá de Guadaira (Seville). The hydrogen production plant will have a capacity of 10.0 MW (PEM) with a H2 production target of 1.500Tn/year Hydrogen production for industrial (steel industry) and mobility use of the Consortium Awarded under the NextGen EU through the Spanish "Programa H2 Pioneros" 	Membership
New Garray	 Redexis was awarded by a public body of Castilla y León (SOMACYL) the construction of electrolyser plant The hydrogen production plant will have a capacity of 2.5 MW (PEM) with a H2 production target of 300Tn/year The plant is estimated to avoid CO2 emissions of up to 2,000 Tn/year. First hydrogen production plant in Castilla y Leon, with applications in industrial and mobility, allowing to develop local areas 	European Clean Hydrogen Alliance European Clean Hydrogen Alliance
	 R&D Project of Development of green hydrogen production and storage technologies based on the use of waste and by-products to improve cost and efficiency Supported under "Science and Innovation Missions" programme and subsidised by the CDTI and Next GenerationEU fund Redexis role: storage of green hydrogen in the form of ammonia 	Spanish National Hydrogen Association
Desire H2	 Partnership with Air Liquid to eventually develop hydrogen mobility value chain with the aim of reducing the carbon footprint Objective of accelerating the development of hydrogen vehicles in Spain, providing a sustainable solution to the transport sector Project: deployment of a hydrogen refuelling stations network, strategically located in the main logistic centres and transport corridors Selected by the ECH2A (European Clean Hydrogen Alliance) and pre-selected by IPCEI (Important Projects of Common European Interest) 	FINEACTOR ARA EL FISSARRIU, COR LA NUYUS FISSARRIU, COR LA NUYUS IN AAAGON Aragón Hydrogen Foundation
HYDROGENIZING	 Aim to create a green hydrogen value chain in Barcelona, enabling citizens to benefit of H2 and create inclusive ecosystem for SMEs Redexis to eventually develop associated infrastructures, including hydrogen refuelling stations in locations in the metropolitan area of Barcelona Initial proposed production of green hydrogen from 20 MW of electrolysis capacity to increase over time Awarded under the NextGen EU through the Spanish "Programa H2 Pioneros" 	Sustainable Transport Association
GREEN HYSLAND	 1st project replicating end to end the renewable hydrogen value chain, in the Balearic Islands (Spain) Production of 300 ton/year of renewable hydrogen for transport and supply of gas, reducing CO2 emissions by 20.700 ton/year Selected by "Fuel Cells and Hydrogen Joint Undertaking" (FCH JU) of the European Commission Redexis to build, among others, the first hydrogen pipeline in Spain 	sedigas Hydrogen Think Thank of the Spanish Gas Association
OCEANH ₂	 Seeks to design and validate Spain's first offshore plant for generating, storing and distributing green hydrogen. Simultaneously developed in six Spanish autonomous regions bringing about technological synergies and national scientific capabilities Supported by the Spanish Ministry under "Science and Innovation Missions" programme and subsidised by the CDTI Redexis to provide experience on transmission and distribution networks 	Clúster Andaluz del Hidrógeno
HIGOS Hydrogen in Gas Grids	 A systematic validation approach at various hydrogen admixture levels into high pressure grids Study of the impact that high levels of hydrogen could have on the gas infrastructure, its components and its management. Testing the performance of the natural gas infrastructure according to the injection of different levels of H2 and different operating conditions Redexis to provide experience on gas networks repurposing and on transmission and distribution networks 	Andalusian hydrogen cluster

Operational review

Redexis contribution to local economy

Tax & Social CAPEX **Geographic presence** Employment contribution +80% **+15**_{€m} +1.600_{em} +3.000of Spanish provinces paid in 2022 in the last 10 years indirect employment Redexis has averaged investments of more than € 150m/year over the last 10 years, becoming key to the **Generating economic** development of Spain' gas infrastructure and enabling the development of renewable gases growth Network of 12.600 km reaching c.1.000 municipalities (presence in 80% of Spain provinces), allowing **Development of rural areas** investments to flow through rural areas, generating +3.000 indirect employment (+1.000 in rural areas) Redexis penetration provides access to alternative and affordable energy sources that allow the Accessibility to renewable substitution of more polluting energies and access to carbon neutral and renewable energy sources. energy sources In 2022, Redexis totalled €15,0m tax and social contributions, representing 35% of the Group's net result Tax & Social contribution (excluding tax & social payments)

Result attributable to non-controlling interests	0,0	0,0	0,0%

Comments

- €170,3m EBITDA, -5,1% YoY due to high temperatures in 4Q2022 and energy context. Growth strategy on accretive segments and cost management partially neutralised demand decline and impact of the '21-26 remuneration review
- Revenue growth +2,9% YoY driven by distribution growth, the integration of LPG add-ons and incremental regulated prices of LPG
- Distribution remuneration decreased -5,3% YoY affected by record-high temperatures from October to December and transitory decrease of cogeneration volumes. Distribution growth drove +3,7% YoY increase on other regulated distribution income
- Transmission remuneration -1,2% YoY, offsetting regulatory impact through incentives to overperformance on low gas losses, the execution of remunerated IT projects to improve transmission efficiency and revenue from operation gas costs/supplies
- LPG business performed +23,7% YoY by the integration of addons, and incremental regulated prices of LPG which are also reflected in higher supplies
- Cost discipline aligned with current activity level, and reflective of pass-throughs
- Net result of €28,4m
