INDEPENDENT AUDITOR'S REPORT ON CONSOLIDATED FINANCIAL STATEMENTS

To the Shareholders of Redexis, S.A.U.,

Opinion

We have audited the consolidated financial statements of Redexis, S.A.U. (the Parent) and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2023, and the consolidated statement of profit or loss, consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated statement of cash flows and notes to the consolidated financial statements for the year then ended.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated equity and consolidated financial position of the Group as at 31 December 2023, and its consolidated results and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union (EU-IFRSs) and the other provisions of the regulatory financial reporting framework applicable to the Group in Spain.

Basis for Opinion

We conducted our audit in accordance with the audit regulations in force in Spain. Our responsibilities under those regulations are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report.

We are independent of the Group in accordance with the ethical requirements, including those pertaining to independence, that are relevant to our audit of the consolidated financial statements in Spain pursuant to the audit regulations in force. In this regard, we have not provided any services other than those relating to the audit of financial statements and there have not been any situations or circumstances that, in accordance with the aforementioned audit regulations, might have affected the requisite independence in such a way as to compromise our independence.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Most Significant Audit Matters

The most significant audit matters are those matters that, in our professional judgement, were considered to be the most significant risks of material misstatement in our audit of the consolidated financial statements of the current period. These risks were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on those risks.

Measurement of the goodwill and intangible assets with an indefinite useful life arising from business combinations carried out in prior years

Description

As described in Note 8 to the accompanying consolidated financial statements, the Group's non-current assets include goodwill amounting to EUR 228,549 thousand and intangible assets with an indefinite useful life relating to gas distribution and transmission licences amounting to EUR 542,914 thousand arising from business combinations carried out in prior years.

The assessment of the recoverable amount of the goodwill and intangible assets with an indefinite useful life both allocated to the transmission and distribution operating segments requires the use of significant judgements and estimates by management, in estimating both the performance of the activity and the future growth of the business estimation.

We identified this matter as one of the most significant matters in our audit based on both the magnitude of the amounts affected and the high degree of judgement required of management when assessing the recoverable amount of the goodwill and intangible assets with an indefinite useful life.

Procedures applied in the audit

Our audit procedures included, among others, evaluating the feasibility of the valuation methodology and key assumptions used by management.

In this respect, we evaluated the feasibility of the cash flow projections and the discount rates applied by comparing the assumptions made with data obtained from both internal and external sources, and performed a critical evaluation of the key assumptions in the models used.

In particular, we verified the feasibility of the remuneration formulae used for the estimation of the revenue having checked that they were consistent with the current regulations, as well as the use of a terminal value in the valuation of assets by applying a perpetual growth rate, for which we have involved our internal valuation specialists.

In addition, we have conducted a retrospective review on prior years estimations with the aim of identifying bias in management cash flow projections and assessed the historical compliance of the Group's budgets in order to assess the reliability of the estimates made by the Management.

Measurement of the goodwill and intangible assets with an indefinite useful life arising from business combinations carried out in prior years

Description

Procedures applied in the audit

Finally, we have performed a sensitivity analysis regarding the key assumptions and assumptions identified, also evaluating whether the note 3.g), 3.f) and 8 of the attached consolidated annual accounts include all relevant disclosures required in accordance with the applicable financial reporting regulatory framework.

Recognition of revenue from the gas system

Description

Procedures applied in the audit

As described in notes 1 and 4 to the attached consolidated annual accounts, the principal activity of the parent company is the distribution and transport of gas and petroleum products of any kind whose revenues are calculated on the basis of the remuneration formulae contained in the applicable regulations and subject to the system of liquidations of the National Commission on Markets and Competition (CNMC).

In this context, the accuracy and cut-off of the sales, due to the factors described above, were considered to be significant matters in our audit for 2023.

Our audit procedures included, among others, understanding the regulated revenue process followed by the Group, reviewing current legislation and evaluating compliance therewith.

These tests were applied together with procedures to verify the applicable remuneration parameters and management information used by the Group to calculate the revenue for the year. In addition, the correct recognition of the settlements received in the year was verified, together with the collections made from and payments made to the associated gas system.

Lastly, we checked that the disclosures included in Notes 3.o) and 28 to the accompanying consolidated financial statements in connection with this matter were in conformity with those required by the applicable accounting regulations.

Other Information: Consolidated Directors' Report

The other information comprises only the consolidated directors' report for 2023, the preparation of which is the responsibility of the Parent's directors and which does not form part of the consolidated financial statements.

Our audit opinion on the consolidated annual accounts does not cover the consolidated management report. Our responsibility for the consolidated management report, as required by the regulations governing the audit activity, consists of:

a) Only verify that the consolidated non-financial information statement has been provided in the manner provided for in the applicable regulations and, if not, report on it.

b) To evaluate and report on the consistency of the rest of the information included in the consolidated directors' report with the consolidated annual accounts, based on the knowledge of the Group obtained during the audit of those accounts, and to assess and report on whether the content and presentation of this part of the consolidated directors' report comply with the applicable rules. If, based on the work we have done, we conclude that there are material improprieties, we are obliged to report it.

Based on the work done, as described above, we have verified that the information referred to in paragraph a) above is provided in the manner provided for in the applicable regulations and that the rest of the information contained in the consolidated directors' report is consistent with that of the consolidated annual accounts for the financial year 2023 and its content and presentation are in accordance with the applicable rules.

Responsibilities of the Parent's Directors for the Consolidated Financial Statements

The Parent's directors are responsible for preparing the accompanying consolidated financial statements so that they present fairly the Group's consolidated equity, consolidated financial position and consolidated results in accordance with EU-IFRSs and the other provisions of the regulatory financial reporting framework applicable to the Group in Spain, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Parent's directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the audit regulations in force in Spain will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

A further description of our responsibilities for the audit of the consolidated financial statements is included in Appendix I to this auditor's report. This description, which is on the following page, forms part of our auditor's report.

DELOITTE, S.L.

Registered in ROAC under no. S0692

Javier Medrano Domínguez

Registered in ROAC under no. 22892

20 March 2024

Appendix I to our auditor's report

Further to the information contained in our auditor's report, in this Appendix we include our responsibilities in relation to the audit of the consolidated financial statements.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

As part of an audit in accordance with the audit regulations in force in Spain, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Parent's directors.
- Conclude on the appropriateness of the use by the Parent's directors of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the Parent's directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the significant risks communicated with the Parent's directors, we determine those risks that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the most significant assessed risks.

We describe those risks in our auditor's report unless law or regulation precludes public disclosure about the matter.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

(1) Nature, activities and composition of the Group

Redexis, S.A.U. (hereinafter, the Company or the Parent) was incorporated with limited liability under Spanish law in Madrid on 6 April 2000. Its registered office is located at Mahonia n.º 2, 28043 Madrid and its tax residence is at Avda. Ranillas, n.º 1, bloque D, planta 2.º. C.P. 50018, Zaragoza (Spain). On 20 May 2021, the Parent's Shareholders General Meeting resolved to change the company name from Redexis Gas, S.A. to Redexis, S.A.

The statutory activity of Redexis, S.A.U. primarily entails the distribution and transmission of all types of gas and oil-based products for domestic, commercial and industrial purposes, the use of any by-products, and related activities.

Redexis, S.A.U. is the Parent of a group of subsidiaries (hereinafter, the Group). Information on subsidiaries, associate and/or related entities is provided in Appendix I and Appendix II.

Therefore, at 31 December 2022, Redexis, S.A.U. was 33.33% owned by Chase Gas Investments Limited; is 33.34% owned by Arbejdsmarkedets Tillægspension (ATP); and is 33.33% owned by Guotong Romeo Holdings Limited.

During the fiscal year 2023, in order to give effect to the legally established principle of separation of activities between regulated activities and those dedicated to the production of gases and, in compliance with the provisions of article 63 of Hydrocarbon Law 34/1998, of 7 October (Note 4), a corporate reorganisation process has been carried out consisting of: (i) incorporating a newly created company (Redexis Energía S.A.), in order for this company to act as the holding company of the business group, (ii) carrying out the simultaneous contribution of the shares of Redexis S.A.U. to the newly incorporated holding company, operations which were completed on 20 December 2023.

As a result of the corporate reorganisation process, the shares of Redexis, S.A.U. are now fully owned by its parent company, Redexis Energía, S.A., thus becoming the sole shareholder of Redexis, S.A.U., and the latter is now a single-member company.

The shareholding of Redexis Energía S.A. now also consists of the companies Arbejdsmarkedets Tillægspension (hereinafter "ATP"), Chase Gas Investments Limited (hereinafter "Chase") and Guotong Romeo Holdings Limited (hereinafter "Guotong") in the same shareholding as they held in Redexis S.A.U., that is, each of them holding 33.34%, 33.33% and 33.33%, respectively, of the shares of the new company.

In 2023, Redexis Gas Servicios, S.L.U., a subsidiary of the parent company Redexis, S.A.U., carried out the following commercial transactions:

- It has incorporated the limited liability company H2 Duero, S.L., with 80% of its share capital, the remaining 20% being owned by Somacyl, S.A. Its corporate purpose is, among others, to carry out activities, works and services related to the business of production, transmission, storage, supply and marketing of hydrogen, biogas, carbon dioxide and other energy fluids (biofuels and other derivatives), through its own or third-party facilities, as well as the design, construction, commissioning, operation and maintenance of all types of infrastructure and complementary facilities necessary for these activities.

Notes to the Consolidated Annual Accounts

- It has incorporated 9 limited liability companies whose corporate purposes are, inter alia, the performance of activities, works and services related to the production and supply of energy and, in particular, renewable gases and their derivatives.
- It has acquired 70% of the share capital of Energygreen Gas Almazán, S.L. and 100% of the share capital of Galivi Solar, S.L. (renamed Biored Lorca S.L.U since February 2024), both operating companies mainly dedicated to the management, treatment and disposal of non-hazardous waste (mainly from the agricultural and food industry) and its use for the production of biogas and other derivatives such as agricultural fertilisers.

(2) Basis of Presentation

The Consolidated Annual Accounts for 2023 have been prepared on the basis of the accounting records of Redexis, S.A.U. and of the consolidated companies and in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU), and other applicable provisions in the financial reporting framework, to give a true and fair view of the consolidated equity and consolidated financial position of Redexis, S.A.U. and subsidiaries at 31 December 2023 and consolidated results of operations and changes in consolidated equity and cash flows of the Group for the year then ended.

The Governing Body of the Parent considers that the Consolidated Annual Accounts for 2023, authorised for issue on 28 February 2024, will be approved with no changes by the sole shareholder. The annual accounts for the 2022 financial year were approved by the Shareholders General Meeting on 25 May 2023.

The standards or interpretations adopted by the European Union that will be obligatory in coming years are not expected to have a significant impact on the Group's financial statements, although they may entail additional disclosures in the Consolidated Annual Accounts.

a) Basis of preparation of the annual accounts

These Consolidated Annual Accounts have been prepared on a historical cost basis.

b) Comparative information

The accounting criteria were applied uniformly in 2023 and 2022, and there are no operations or transactions recorded following different accounting principles that might cause discrepancies in the interpretation of the comparative figures for both periods.

The Consolidated Statement Of Financial Position, Consolidated Income Statements, Consolidated Statement Of Comprehensive Income, Consolidated Statement Of Changes In Equity, Consolidated Statement Of Cash Flows and the Consolidated Annual Report, in addition to the figures of the year 2023, include comparative figures for the previous year, approved by the shareholders at the General Meeting held on 25 May 2023.

Notes to the Consolidated Annual Accounts

c) Functional and presentation currency

The functional currency used by the Group is the Euro. The figures contained in the attached annual accounts are expressed in thousands of Euros, unless otherwise indicated, and are therefore rounded to the closest figure, with the Euro being the functional currency.

d) Relevant accounting estimates, assumptions and judgements used when applying accounting principles

Relevant accounting estimates and judgements and other estimates and assumptions have to be made when applying the Group's accounting principles to prepare the Consolidated Annual Accounts under IFRS-EU. A summary of the items requiring a greater degree of judgement or which are more complex, or where the assumptions and estimates made are significant to the preparation of the Consolidated Annual Accounts, is as follows:

- Useful lives of property, plant and equipment and intangible assets (see Notes 3.d and 3.f)
- The assessment of the recoverability of intangible assets with an indefinite useful life and goodwill to determine any impairment losses (see Note 3.g)
- The assessment of whether deferred tax assets are likely to be recovered based on the business plan for the coming years and the recovery periods stipulated in Spanish tax legislation for the recovery of those assets, as well as the resolution of possible differences in interpretation with the Tax Administration (see Notes 3.p and 13)

The Group directors' estimates were calculated on the best information available as of 31 December 2023. Unforeseen future events could make it necessary to make changes in the coming years, which might lead to adjustments in the consolidated annual accounts that would be recorded prospectively, as the case may be.

e) Standards and interpretations adopted early or other changes in accounting policies

The following standards were published for their use in the European Union.

- ✓ Amendment to IAS 1 to decrease the difficulties of entities in applying the concept of materiality as regards the requirements to disclose 'significant accounting policies'.
- ✓ Amendment to IAS 1 as regards the classification of current or non-current liabilities.
- ✓ Amendment to IAS 8 on the definition of accounting estimates to facilitate the distinction between a change in accounting estimate and a change in accounting policy.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

- ✓ Amendment to IAS 12 clarifying how to recognise deferred tax arising from assets and liabilities resulting from a single transaction.

None of these standards has had a relevant impact on the Group's Financial Statements.

Furthermore, the following mandatory standards, modifications and interpretations as of 1 January 2024 were approved:

- ✓ Amendment to IFRS 16 clarifying the accounting for liabilities arising on sale and leaseback transactions.
- ✓ Amendment to IAS 7 and IFRS 17 introducing new disclosures on financing arrangements with suppliers.

f) Principle of going concern

The Directors have formulated these consolidated annual accounts in accordance with the principle of the company as a going concern.

(3) Accounting Principles

(a) Subsidiaries

Appendix I to these consolidated annual accounts lists the subsidiaries of Redexis, as well as the percentage of ownership and the consolidation method applied to them.

Subsidiaries are entities over which the Parent Company, either directly or indirectly through subsidiaries, exercises control. The Parent Company controls a subsidiary when it is exposed, or has rights, to variable returns from its involvement with the subsidiary and has the ability to affect those returns through its power over the subsidiary. The Parent Company has power over a subsidiary when it has existing substantive rights that give it the ability to direct the relevant activities. The Parent Company is exposed, or has rights, to variable returns from its involvement with the subsidiary when its returns from its involvement have the potential to vary as a result of the subsidiary's performance.

In order to determine the existence of sole control, joint control and/or significant influence in each entity of the Group, the consistency between the shareholding and political control of the company is reviewed, by virtue of the articles of association and agreements between shareholders.

Investments in subsidiaries are accounted for using the full consolidation method when the Redexis Group has full or unshared control of the investee.

Investments in subsidiaries are accounted for using the equity method when the Redexis Group has significant influence or joint control, that is, the power to influence financial and operating policies, but not sole control.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

The result of valuing investments using the equity method is reflected under “Other reserves” in the Consolidated Statement of Financial Position and “Result of investments accounted for using the equity method” in the Consolidated Income Statements.

The income, expenses and cash flows of subsidiaries are included in the Consolidated Annual Accounts from the date of acquisition, which is when the Group takes control, until the date that control ceases. The subsidiary entities are excluded from the consolidation as of the date on which the control is lost.

At the date of taking control, the assets, liabilities and contingent liabilities of the subsidiary are measured at fair value. If there is a positive difference between the acquisition cost of the subsidiary and the market value, this is recorded as goodwill, as it corresponds to assets that cannot be separately identified and measured. If the difference is negative, it is recorded as a credit to consolidated profit/loss.

Transactions and balances with Group companies and unrealised gains or losses have been eliminated on consolidation. Nevertheless, unrealised losses have been considered as an indicator of impairment of the assets transferred.

The subsidiaries' accounting policies have been adapted to Group accounting policies for like transactions and events in similar circumstances.

The annual accounts or financial statements of the subsidiaries used in the consolidation process have been prepared as of the same date and for the same period as those of the Parent.

During the year, the Group's scope of consolidation was extended with:

- 9 new companies were established, all of which are wholly owned (100% ownership) and therefore consolidated using the global integration method. One of these companies, Galivi Solar, S.L., is already operational, while the rest are newly created. All of these companies are involved in biogas-related activities as an energy source; Biored Bajo Cinca, S.L., Biored Arevalo, S.L., Biored Cuellar, S.L., Biored Ejea, S.L., Eficiencia y Red Solar, S.L., Biored Medina del Campo, S.L., Biored Alcores, S.L. y Biored Calatayud, S.L.;
- 4 new companies were established under joint management and accounted for using the equity method. One of these companies, Energygreen Gas Almazán, S.L., is already operational, while the remaining three are newly created. The company H2Duero, S.L., in which Redexis owns 80% of the property, is related to hydrogen as a renewable energy source, while the other three are related to biogas. Redexis owns 75% of the property of both Biored Vegas Altas, S.L. and Biored Cella, S.L., and 70% of Energygreen Gas Almazán, S.L.

On February 10, 2023, the company Redexis Gas Servicios, S.L.U. from the Redexis Gas Group acquired 70% of the shares of Energygreen Gas Almazán, S.L.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

On November 21, 2023, the company Redexis Gas Servicios, S.L.U. from the Redexis Gas Group acquired 100% of the shares of Galivi Solar, S.L. This acquisition resulted in the creation of goodwill, which corresponds to the difference between the consideration paid and the fair value of the assets and liabilities acquired from the company. The Group is currently analyzing the allocation of goodwill, which will be completed within one year, as established by IFRS 3.

(b) Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group's steering committee to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

(c) Non-Controlling interests

Non-controlling interests in subsidiaries acquired are recognised at the acquisition date based on the ownership percentage of the fair value of the identifiable net assets.

Non-controlling interests are disclosed in consolidated equity separately from equity attributable to shareholders of the Parent. Non-controlling interests' share in consolidated profit/loss for the year and in consolidated total comprehensive income for the year is disclosed separately in the Consolidated Income Statements and the Consolidated Statement of Comprehensive Income.

The total comprehensive income for the year and changes in equity of the subsidiaries attributable to the Group and non-controlling interests, after consolidation adjustments and eliminations, are determined in accordance with the ownership percentage at year end.

(d) Property, plant and equipment

Property, plant and equipment are recognised at cost, less accumulated depreciation and any accumulated impairment losses. The cost of self-constructed assets, mainly for the transmission and distribution of natural gas and liquefied petroleum gas, is determined using the same principles as for an acquired asset, while also considering the criteria applicable to production costs of inventories and the network construction required in properties until the supply points come into service. The production cost is capitalised by allocating the costs attributable to the asset to "Self-constructed non-current assets" in the consolidated income statement.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

The cost of PPE includes the estimated costs of dismantling or removal and the restoration of the site on which it is located. At the time of the initial valuation of PPE, the Group estimates the current value of the future obligations derived from the dismantling, removal or others associated with that PPE, as well as the costs of site rehabilitation. That current value is activated as the higher cost of the corresponding asset, giving rise to the recognition of a provision (see Note 3n), subject to the financial update in the years following its creation.

Property, plant and equipment are depreciated by allocating the depreciable amount of the asset on a systematic basis over its useful life. The depreciable amount is the cost of an asset, less its residual value. The Group determines the depreciation charge separately for each asset based on its type.

Property, plant and equipment are depreciated using the following criteria:

4.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Depreciation method	Estimated years of useful life
Buildings	Straight-line	10-50
Technical installations and machinery:		
Liquefied natural gas plant	Straight-line	20
Regulation and metering stations	Straight-line	20-30
Community Receiving Facilities	Straight-line	20
Distribution networks	Straight-line	20
Meter-reading equipment	Straight-line	10
Gas pipelines	Straight-line	40
LPG facilities	Straight-line	20
Photovoltaic Installations	Straight-line	15
Optical fibre	Straight-line	20
Refuelling stations	Straight-line	20
Hydrogen pipeline	Straight-line	20
Biomethane Plant	Straight-line	10-20
Other items of property, plant and equipment	Straight-line	4-20
Other installations, equipment and furniture	Straight-line	4-20
Motor Vehicles	Straight-line	8

Transmission facilities are depreciated over their useful life according to the estimate made for items of property, plant and equipment. For gas pipelines this is 40 years and for regulation and metering stations it is 30 years. These estimates are in line with Royal Decree 326/2008 of 29 February, which sets the remuneration for natural gas transmission activities for facilities that came into service subsequent to 1 January 2008.

The Group reviews residual values, useful lives and depreciation methods at each financial year end. Changes to initially established criteria are accounted for as a change in accounting estimates.

Subsequent to initial recognition of the asset, only costs that will probably generate future economic benefits and which may be measured reliably are capitalised, including the costs required for the assets to operate as envisaged by management and in accordance with the applicable legal and regulatory requirements. Costs of day-to-day servicing are recognised in the Income Statements as incurred.

Replacements of property, plant and equipment that qualify for capitalisation are recognised as a reduction in the carrying amount of the items replaced. Where the cost of the replaced items has not been depreciated independently and it is not possible to determine the respective carrying amount, the replacement cost is used as indicative of the cost of the replaced items at the time of acquisition or construction.

The Group measures and determines impairment to be recognised or reversed based on the criteria in section (g).

Notes to the Consolidated Annual Accounts

(e) Right of use assets

(i) Identification of a lease

At the start of a contract, the Group evaluates whether it contains a lease. A contract is or contains a lease, if it grants the right to control the use of the asset identified for a period of time in exchange for a consideration. The period of time during which the Group uses the asset, includes consecutive and non-consecutive periods of time. The Group only re-evaluates the conditions when an amendment of the contract occurs.

These include subsoil occupancy rates for the gas distribution activity well as the fees for subsoil occupancy for the gas transmission activity.

(ii) Lessee reporting

In contracts with one or more lease and various lease components, the Group assigns the consideration of the contract to each component of the lease in accordance with the individual sale price of the lease component and the aggregate individual price of the various components of the lease.

Any payments made by the Group that do not entail the transfer of goods or services to it by the lessor do not comprise a separate component of the lease, but instead form part of the total consideration of the contract.

At the start of the lease, the Group recognises one right of use asset and one lease liability. The right of use asset is comprised of the amount of the lease liability, any payment for the lease made on or prior to the starting date, less any incentives received, the initial direct costs incurred and an estimate of the costs for dismantling or restoration to be incurred, as indicated in the accounting policy provisions.

The Group measures the lease liability by the present value of the lease payments pending on the starting date. The Group discounts lease payments at the appropriate incremental interest rate, unless the implicit interest rate of the lessor may be determined reliably.

The pending lease payments are comprised of fixed payments, less any incentive to be collected, the variable payments that depend on an index or rate, initially appraised by the index or rate applicable on the starting date, the amounts expected to be paid for residual value guarantees, the price of exercising the purchase option whose exercise is reasonably certain and any compensation payments for contract termination, providing the term of the lease reflects the termination option.

The Group measures the right of use assets at cost, less depreciation and accrued impairment losses, adjusted by any re-estimate of the lease liability.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

If the contract transfers the ownership of the asset to the Group at the end of the lease term or the right of use asset includes a purchase option, the criteria for depreciation indicated in the section on property, plant and equipment are applied from the starting date of the lease through the end of the useful life of the asset. Otherwise, the Group depreciates the right of use asset from the starting date until the earlier date between the useful life of the right or the end of the lease.

The Group applies the non-current asset impairment criteria indicated in section (g) to the right of use assets.

The Group measures the lease liability increasing it by the financial expense accrued, decreasing it by any payments made and re-estimating the carrying amount by amendments of the lease or to reflect any updates of in-substance fixed payments.

If the amendment does not result in a separate lease, on the amendment date, the Group assigns the consideration to the amended contract as indicated above, re-determines the term of the lease and re-estimates the value of the liability deducting any revised payments at the revised interest rate. The Group decreases the carrying amount of the right of use asset to reflect the partial or total termination of the lease, in those amendments that decrease the scope of the lease and records the profit or loss in the income statement. For all other amendments, the Group adjusts the carrying amount of the right of use asset.

A.

Notes to the Consolidated Annual Accounts

(f) Intangible assets

- Goodwill

Goodwill is not amortised but is tested for impairment annually or more frequently where events or circumstances indicate that an asset may be impaired. Goodwill on business combinations is allocated to the cash-generating units (CGUs) or groups of CGUs which are expected to benefit from the synergies of the business combination and the criteria described in section (g) (impairment) are applied. After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

- Licences

This item reflects the amounts measured by an independent expert on government authorisations, from the merger of the Group, for the distribution and transmission of gas in the various areas in which the Parent and the subsidiaries conduct or will conduct their activities, less any impairment, as appropriate.

In accordance with the legal framework under which they were granted, these authorisations do not have a limited duration.

- Computer software

Computer software is carried at cost in the Consolidated Statement of Financial Position, less any accumulated amortisation and impairment losses. Computer software maintenance costs are charged as expenses when incurred.

- Other intangible assets

This item reflects the amounts incurred by government authorisations, subsequently to the merger of the Group, for the distribution and transmission of gas in the various areas in which the Parent and the subsidiaries conduct or will conduct their activities, less any impairment as appropriate for accumulated amortisation and impairment losses. Costs incurred in relation to and prior to obtaining government authorisation are initially recognised under intangible assets and subsequently transferred to the Income Statements if the Group has reasonable doubts as to whether authorisation will be obtained.

4.

Notes to the Consolidated Annual Accounts

(i) Useful life and amortisation rates

The Group assesses whether the useful life of each intangible asset acquired is finite or indefinite. An intangible asset is regarded as having an indefinite useful life when there is no foreseeable limit to the period over which the asset will generate net cash inflows.

Intangible assets with indefinite useful lives or that are not limited in duration are not amortised, but are instead tested for impairment on an annual basis or whenever there is an indication that the intangible asset may be impaired. The Group has estimated that government authorisation or licences for the distribution and transmission of gas have an indefinite useful life as, in accordance with the legal framework under which they were granted, they do not have a limited duration.

Intangible assets with finite useful lives are amortised by allocating the depreciable amount of an asset on a systematic basis over its useful life, by applying the following criteria:

	Depreciation method	Estimated years of useful life
Computer software	Straight-line	4-5
Other intangible assets	Straight-line	5-20

The depreciable amount is the cost or deemed cost of an asset, less its residual value.

The Group reviews the residual value, useful life and amortisation method for intangible assets at each financial year end. Changes to initially established criteria are accounted for as a change in accounting estimates.

(ii) Impairment

The Group measures and determines impairment to be recognised or reversed based on the criteria in section (g).

(g) Impairment of non-financial assets

The Group evaluates whether there are indications of possible impairment losses on non-financial assets subject to amortisation or depreciation to verify whether the carrying amount of these assets exceeds the recoverable amount.

The Group tests goodwill and intangible assets with indefinite useful lives for impairment at least annually, irrespective of whether there is any indication that the assets may be impaired.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

The recoverable amount of the assets is the higher of their fair value less costs of disposal and their value in use.

Negative differences resulting from comparison of the carrying amounts of the assets with their recoverable amount are recognised in profit and loss.

The recoverable amount is determined for each individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. If this is the case, the recoverable amount is determined for the cash-generating unit (CGU) to which the asset belongs.

Impairment losses for cash-generating units are allocated first to reduce the carrying amount of goodwill allocated to the unit and then to the other assets of the unit pro rata with their carrying amounts. The carrying amount of each asset may not be reduced below the highest of its fair value less costs of disposal, its value in use and zero.

At the end of each reporting period the Group assesses whether there is any indication that an impairment loss recognised in prior periods may no longer exist or may have decreased. Impairment losses on goodwill are not reversible. Impairment losses on other assets are only reversed if there has been a change in the estimates used to calculate the recoverable amount of the asset.

A reversal of an impairment loss is recognised in profit or loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss may not exceed the carrying amount that would have been determined, net of depreciation or amortisation, had no impairment loss been recognised.

A reversal of an impairment loss for a CGU is allocated to the assets of that unit, except goodwill, pro rata with the carrying amounts of the assets. The carrying amount of an asset may not be increased above the lower of its recoverable amount and the carrying amount that would have been disclosed, net of amortisation or depreciation, had no impairment loss been recognised.

(h) Financial instruments

Financial instruments are classified on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the economic substance of the contractual arrangement and the definitions of a financial asset, a financial liability and an equity instrument in IAS 32 "Financial Instruments: Presentation".

The Group recognises financial instruments when it becomes party to the contract or legal transaction, in accordance with the terms set out therein.

For measurement purposes, the Group classifies financial instruments as financial assets and liabilities carried at amortised cost.

Notes to the Consolidated Annual Accounts

The Group classifies a financial asset at amortised cost if it remains within the scope of a business model whose purpose is to maintain financial assets to obtain cash flows and the contractual conditions of the financial asset give rise, on specific dates, to cash flows that are only payments of principal and interest on the amount of principal pending.

(i) Offset principles

A financial asset and a financial liability can only be offset when the Group has a legally enforceable right to offset the recognised amounts or intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. In order for the Group to have a legally enforceable right, it should not be contingent on a future event and should be legally enforceable in the ordinary course of operations, in cases of insolvency or of liquidation declared legally and in the event of non-payment.

(ii) Financial assets and liabilities at amortised cost

Financial assets and liabilities at amortised cost are initially recognised at fair value, plus or minus the transaction costs incurred, and are subsequently measured at amortised cost using the effective interest rate.

(iii) Reclassifications of financial instruments

The Group reclassifies financial assets when it changes the business model for its management. The Group does not reclassify financial liabilities.

(iv) Impairment

The Group recognises a valuation adjustment in the Income Statements for anticipated future credit losses of the financial assets measured at amortised cost.

On each closing date, the Group measures the valuation adjustment in an amount equal to the credit losses anticipated in the following twelve months, for the financial assets for which the credit risk has not increased significantly from the date of initial recognition or when it considers that the credit risk of a financial asset has no longer increased significantly.

The Group considers that the credit risk has increased significantly from initial recognition when non-payments exist for a period greater than 180 days.

(v) Financial asset disposals, modifications and cancellations

Financial assets are de-recognised when the rights to receive cash flows relating to these have expired or have been transferred and the Group has substantially transferred the risks and benefits deriving from their ownership.

(vi) Interest and dividends

Notes to the Consolidated Annual Accounts

The Group recognises interest by the effective interest method, which is the rate adjustment that equals the carrying amount of a financial instrument with the estimate cash flows throughout the expected lifetime of the instrument, starting from its contractual conditions and without considering the anticipated credit losses, except for financial assets acquired or originating with losses incurred.

(vii) Financial liability disposals and modifications

The Group de-recognises a financial liability or part thereof when it has complied with the obligation contained in the liability or if it is legally dispensed from the primary responsibility contained in the liability, whether by virtue of a legal process or by the creditor.

(i) Distributions to shareholders

Dividends, whether in cash or in kind, are recognised as a reduction in equity when approved by the shareholders at their annual general meeting.

(j) Inventories

Inventories are initially measured at the lower of cost of purchase and net realisable value.

The purchase price comprises the amount invoiced by the seller, after deduction of any discounts, rebates or other similar items, plus any additional costs incurred to bring the goods to a saleable condition, other costs directly attributable to the acquisition, as well as finance costs and indirect taxes not recoverable from the Spanish taxation authorities.

Subsequently, the Group values its inventories at weighted average cost.

The cost of inventories is written down in those cases in which its cost exceeds its net realisable value. For these purposes, net realisable value is understood as its replacement price.

The Group uses the same cost model for all inventories of the same nature and with a similar use.

(k) Cash and cash equivalents

Cash and cash equivalents include cash on hand and demand deposits in financial institutions. They also include other short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(l) Government grants and Other liabilities

Government grants are recognised when there is reasonable assurance that the Group will comply with the conditions attaching to them, and that the grants will be received.

Notes to the Consolidated Annual Accounts

Capital grants awarded to the Group are primarily to carry out works and are non-refundable. These grants are measured at the fair value of the sum received, and are recognised under "Government grants and other liabilities" in the Consolidated Statement of Financial Position and taken to "Other income" over the same period and in proportion to the depreciation of the subsidised assets or when the assets are disposed of or impaired.

Other liabilities also includes connection charges as monetary consideration for the installation works and operations required to serve new gas supply points or extend existing ones. These connection charges are recognised as income in proportion to the annual depreciation of the assets being financed (20 years), or over the period specified in the contract if this is shorter, or, where applicable, when the assets are disposed of or impaired.

(m) Employee benefits

The Group has contracted pension commitments with certain members of its workforce. These obligations, acquired through the defined contribution scheme, are basically arranged through pension plans or insurance policies.

Defined benefit plans

Defined benefit liabilities recognised in the Consolidated Statement of Financial Position reflect the present value of defined benefit obligations at the reporting date, minus the fair value at that date of plan assets.

The Group recognises actuarial losses and gains in other comprehensive income in the year in which they occur. These actuarial losses and gains are recognised immediately in retained earnings. They are not recorded in the Income Statements in a subsequent year.

Income or expense related to defined benefit plans is recognised as employee benefits expense and is the sum of the net current service cost and the net interest cost of the net defined benefit asset or liability.

The present value of defined benefit obligations and the related current service cost and past service cost are calculated annually by independent actuaries using the Projected Unit Credit Method. The discount interest rate is calculated based on the yield on high quality corporate bonds of a currency and term consistent with the currency and term of the post-employment benefit obligations.

Assets and liabilities arising from defined benefit plans are recognised as current or non-current based on the period of realisation of related assets or settlement of related liabilities.

Defined contribution plans

The Group recognises the contributions payable to a defined contribution plan in exchange for a service when an employee has rendered service to the Group. The contributions payable are recognised as an expense for employee remuneration, and as a liability after deducting any contribution already paid.

Notes to the Consolidated Annual Accounts

(n) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and a reliable estimate can be made of the amount of the obligation.

The policy followed regarding the recording of provisions for risks and expenses consists of recording the estimated amount to cover probable or certain responsibilities arising from litigations in progress and for compensations or pending obligations, warrants and other similar guarantees. Its provision is made when the responsibility or obligation that determines the compensation or payment arises.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period, taking into account all risks and uncertainties surrounding the amount to be recognised as a provision and, where the time value of money is material, the financial effect of discounting provided that the expenditure to be made each period can be reliably estimated. The discount rate is a pre-tax rate that reflects the time value of money and the specific risks for which future cash flows associated with the provision have not been adjusted at each reporting date.

The financial effect of provisions is recognised as a finance cost in profit or loss.

If it is not probable that an outflow of resources will be required to settle an obligation, the provision is reversed. The provision is reversed against the Income Statements item in which the related expense was recognised, and any surplus is accounted for in other income.

Provisions for dismantling, restoration and similar liabilities

These provisions are measured in accordance with the general criteria for provisions and are recognised as an increase in the cost of the associated property, plant and equipment (see Note 3.d).

Changes in provisions resulting from changes in the amount, timing of the outflow of resources or the discount rate increase or reduce the cost of fixed assets up to the carrying amount thereof, whilst any excess is recognised in profit or loss.

(o) Recognition of revenue from contracts with customers

The revenue is evaluated on the basis of the consideration to be received in a contract with a customer and excludes any amounts collected on behalf of third parties. The Group recognises the revenue when it transfers the control of a product or service to the customer.

The following is a summary of the recognition criteria applicable for each one of the activities that generates income in the Group.

Distribution activity

Notes to the Consolidated Annual Accounts

With the distribution activity the regulatory framework identifies the following tasks: to build, operate and maintain networks and facilities for the distribution of natural gas intended for situating the gas at the points of consumption.

This set of tasks constitutes a commitment to the customers and the tasks cannot be performed independently from each other; therefore they are considered to be a single performance obligation which is fulfilled, indefinitely, in accordance with the administrative authorisation granted by the competent Institution on the basis of which it carries out its business, generating the right to receive remuneration or revenue. In this respect, consumers of gas simultaneously receive and consume the benefits of the service at the same time as the Group provides it.

The regulated revenues from distribution activity each year is set ex-ante for each gas year by the National Commission on Markets and Competition (CNMC) in keeping with the new authorities attributed to it, effective as of 1 January 2020 by Royal Decree-Law 1/2019 (formerly attributed to the Spanish Ministry for Ecological Transition).

Therefore, the resolutions of the CNMC published prior to the start of each year, establish the remuneration for the coming year based on expected sales and new customers for that year (for remuneration and rate purposes, the term 'year' hereinafter refers to gas year). As a result, the amount of remuneration is subject to change for up to two years, until the definitive data on demand and new customers is available for the year analysed. With regard to references to 'gas year', it should be noted that in accordance with Additional Provision 1 of CNMC Circular 6/2020, of 22 July, regarding the calculation of local natural gas distribution network tolls and regasification, the gas year and the rate period no longer correspond to the calendar year but instead to the period between 1 October and 30 September of the following year.

As of 2019 the CNMC has developed a series of Circulars that will define the methodology for determining remuneration for the distribution and transmission of natural gas for the following regulatory period (2021-2026). These methodologies establish models that are conceptually very similar to those in force before 2021, but that entail certain adjustments to remuneration as of the year 2021.

This remuneration is comprised of a fixed component (Euro/customer) and two variable components in keeping with the increase (or decrease) in the volume of gas supplied to the customers connected to the network. For variable components, unit tariffs are set on the basis of the pressure of the gas supplied and customer type, for which certain additional incentives exist, such as the gasification of new municipalities, new industrial customers or new vehicular natural gas service stations.

Notes to the Consolidated Annual Accounts

The Group establishes the variable remuneration at the close of each year, using the methodology defined in the regulation, with the best information available at that time (supply as well as demand points), adjusting this figure with the verified information after closing the figures for each year. In turn, and once it has the final figures for the year, the CNMC determines the final amount of this remuneration in the resolution it publishes the following year, and also establishes the provisional remuneration for the year following publication and regularisation of the remuneration for the year in which it is published, with the best figures available at that time.

By means of the Resolution of 19 May 2022 of the CNMC, establishing the remuneration for the 2023 gas year of the companies that perform regulated liquefied natural gas, transmission and distribution facility activities, the CNMC approved the remuneration covering the period between 1 October 2022 and 30 September 2023. In that Resolution the appropriate adjustments were made to the remuneration for the years 2020, 2021 and 2022.

Likewise, by means of the Resolution of 30 May 2023 of CNMC, establishing the remuneration for the 2024 gas year of the companies that perform regulated liquefied natural gas, transmission and distribution facility activities, the CNMC approved the remuneration covering the period between 1 October 2023 and 30 September 2024. In that Resolution the appropriate adjustments were made to the remuneration for the gas years 2021, 2022 and 2023.

This distribution activity remuneration will be adjusted once the final amounts of this Remuneration have been set by the CNMC, based on the actual figures for the average increase in consumers and kWh distributed. The Group does not expect significant differences to arise between the amounts recognised and the final settlements. Nevertheless, any differences will be recognised as a change in accounting estimate in the Consolidated Income Statements when they arise.

These resolutions may, where appropriate, lead to price reviews of certain regulated items, such as connection charges, or meter rental charges. With regard to connection charges, these continue to be those established in Order IET/2445/2014, while the prices for the rental of meters and remote metering equipment for pressures equal to or lower than 4 bar continue to be those established in Appendix III of Order TEC/1367/2018.

During 2023 the Group received the final settlement for regulated activities in the gas sector for 2022, which had an immaterial impact on the Consolidated Income Statement.

In accordance with Ministerial Orders ITC/3126/2005, IET/2446/2013 and IET/2355/2014 and the gas system technical management standards (NGTS), the Group has recognised measurement differences (known as unaccounted for gas) as regulated distribution revenue in the Consolidated Income Statements for 2023 and 2022 in the amount of Euros 4,537 thousand and Euros 4,717 thousand, respectively (see Note 28). In 2023 the measurement differences for 2022 were settled and those for 2021 were settled in 2022.

Notes to the Consolidated Annual Accounts

Transmission activity

The regulatory framework identifies the following tasks within the transmission activity: to build, operate and maintain its own network of gas pipelines, supplying natural gas to the major areas of consumption.

As already indicated for the case of distribution, this set of tasks constitutes a single performance obligation which is fulfilled, indefinitely, in accordance with the administrative authorisation granted by the competent Institution on the basis of which it carries out its business on a straight-line basis.

As with the distribution activity, the gas transmission activity is regulated and the remuneration is set for each gas year by the CNMC in keeping with the new authorities attributed to it, effective as of 1 January 2020 by Royal Decree-Act 1/2019 (formerly attributed to the Spanish Ministry for Ecological Transition).

This remuneration is fixed for gas year and is based on the start-up investment. If in the course of the year new facilities are put into use, the remuneration would be amended in keeping with the increase in facilities, which would be recognised prospectively as of that time.

Due to the aforementioned change in gas year indicated in the section on the distribution activity, that is likewise applicable to the transmission activity, the remuneration recognised for the 2023 transmission activity was established in CNMC Resolution of 19 May 2022, establishing the remuneration for the 2023 gas year of the companies that perform regulated liquefied natural gas, transmission and natural gas distribution facility activities, and in CNMC Resolution of 30 May 2023, establishing the remuneration for the 2024 gas year of the companies that perform regulated liquefied natural gas, transmission and distribution facility activities, insofar as the first Resolution covers the period from 1 October 2022 to 30 September 2023, and the second covers the period from 1 October 2023 to 30 September 2024.

On the other hand, Order TED/1286/2020 and the Resolutions cited in the preceding paragraph include the corresponding adjustments to remuneration for uninterrupted supply from previous years.

The Group records revenue based on its estimate of the remuneration pursuant to applicable legislation and in line with the level of investment.

As previously mentioned, during 2019 and 2020 the CNMC developed a series of Circulars that will define the methodology for determining remuneration for the distribution and transmission of natural gas for the following regulatory period (2021-2026). These methodologies establish models that are conceptually very similar to those set at the time by Act 18/2014, but entail certain adjustments to remuneration as of the year 2021.

Notes to the Consolidated Annual Accounts

In accordance with article 5 of Order ITC/3128/2011 of 17 November on matters relating to third-party access to gas facilities and remuneration for regulated activities, the Group has recognised transmission measurement differences as regulated transmission revenue in the Consolidated Income Statements for 2023 and 2022 at the amount of Euros 542 thousand and Euros 2,285 thousand, respectively (see Note 28).

Additionally, the Group is subject, among other things, to the following regulatory framework in the field of transmission and distribution of natural gas:

- Royal Decree 949/2001 of 3 August 2001, which regulates third-party access to gas facilities and establishes an integrated economic system for the natural gas sector, in accordance with the mandate in article 8 of Royal Decree-Law 6/2000 of 23 June 2000.
- Order TED/1022/2021, of 27 September, regulating the settlement procedures for remuneration from regulated activities, and for specifically allocated gas charges and fees of the gas sector.
- Royal Decree 326/2008 of 29 February 2008, which stipulates the remuneration for natural gas transmission activities for facilities entering into service since 1 January 2008.
- Royal Decree 1434/2002 of 27 December 2002, which regulates transmission, distribution, trading and supply activities and the authorisation procedures for natural gas facilities.

The 2014 deficit in the gas sector, which included the deficits accumulated in prior years, was set at Euros 1,025 million, which regulated entities are able to recover in fifteen consecutive annual payments. On 1 December 2017 the Group assigned the credit right it held with respect to this deficit in the amount of Euros 42 million collected in its entirety.

After the application of the surpluses obtained in the final settlements of subsequent years, the accumulated deficit at 31 December 2014 pending amortisation amounts to Euros 41.1 million, with an annuity of Euros 5.49 million planned for 2024 to continue its amortisation.

Registration fees

The registration fees of a new supply consists of the operation to connect the gas receiving facility to the network of the distribution company, and the review and verification that these adapt to the regulatory technical and safety conditions. This operation usually takes place one sole time and the activities are inseparable, whereby this activity is considered as constituting a single performance obligation.

Registration fees are regulated by each Autonomous Region, at a set price.

The Group recognises the revenue for the registration fees at the moment at which the connection is made and verified, since it is at that moment when the customer

Notes to the Consolidated Annual Accounts

obtains the benefits of the service rendered and there is no future obligation associated with it (Note 28).

Rental of Natural Gas metering equipment

Metering equipment (meter) is installed in the facilities of the end-customer, therefore the service of renting the meter constitutes a performance obligation.

The payment for renting natural gas metering equipment is regulated by the regulatory framework of the sector, at a set price.

The Group recognises the revenue throughout the provision of the service, since the customer simultaneously receives and consumes the benefits of the service at the same time the Group provides it (Note 28).

The method to be used to measure the percentage of completion is the output method, since the service rendered is similar throughout the period, and revenue is recognised on a straight-line basis over time.

Rental of Community Receiving Facilities (CRF)

The Group collects a rental payment for the community receiving facility (CRF) from the owners association without any other type of consideration, therefore the Community Receiving Facility comprises a single performance obligation.

The payment for renting the community receiving facility is the price established in the contract signed with the owners association, which sets a fixed monthly price.

The Group recognises the revenue throughout the term of the contract, since the customer simultaneously receives and consumes the benefits of the service at the same time the Group provides it (Note 28).

The method to be used to measure the percentage of completion is the output method, since the service rendered is similar throughout the period, the revenue is recognised on a straight-line basis.

Inspections of individual receiving facilities (IRF)

In this case the service consists of the inspection of the individual receiving facility (IRF), involving a one-time action, considered as a single performance obligation.

The authority to set inspection prices is transferred to the Autonomous Regions and, therefore, the price may vary from one area to another.

The revenue is recognised at the moment of the inspection, since it is at that time when the customer obtains the benefits of the service rendered (Note 28).

Sale of Liquefied Petroleum Gas (LPG)

The contracts for the sale of LPG identify two separate performance obligations, which are those corresponding to the supply of LPG and the rental of the meter

Notes to the Consolidated Annual Accounts

since, as mentioned above, they comply with the definition for consideration as different from each other. For LPG, the Company supplies as well as distributes the product, and therefore there is a contractual relationship with the customer.

In the case of LPG consumption, the transaction price will be established applying the established official tariff, with a fixed portion (standard monthly rate) and a variable element associated with consumption (Euro cents per Kg.).

The Group recognises the revenue throughout the period of time in which the customer receives and consumes the benefits of the service rendered at the same time the service takes place. Therefore the revenue deriving from this service will be measured by percentage of completion.

For the purpose of measuring this completion, we consider that the output method is the one that best reflects the completion of the rendering of the service, whereby the revenue will be recognised as the service is rendered, by unit of LPG (kg) consumed by the customer, subject to estimate since invoicing does not coincide with the close of the calendar year (Note 28).

Contracting party connection charges

The connection charge of the contracting party consists of the financial consideration for connecting the community receiving facility to the network and the commissioning of the facility. This operation usually takes place at one sole time, whereby it is considered as a single performance obligation.

The connection charges are regulated by the regulatory framework of the sector, at a set price.

The revenue is recognised at the moment of connection of the community receiving facility and the commissioning of gas, since this is the time at which control of the services rendered is transferred to the customer (Note 28).

Applicant connection charges

The Group is authorised to receive a financial consideration for performing the set of installations and operations necessary to cover a new gas supply point or increase the capacity of one already in existence.

In this case a contract is arranged with the customer to establish the characteristics of the installation to be built and the quantity to be received for each service. Furthermore, it is established that the asset built by virtue of the contract will be the property of the Group and a remuneration for building the connection is established. This consideration is a determined fixed quantity.

The Group recognises these connection charges as income in proportion to the annual depreciation of the assets being financed (20 years), or over the period specified in the contract if this is less or, where applicable, when their disposal or impairment occurs, since the customer simultaneously receives and consumes the benefits of the service at the same time the Group provides them. The method to

Notes to the Consolidated Annual Accounts

be used to measure the percentage of completion is the output method, since the service rendered is similar throughout the period, and revenue is recognised on a straight-line basis over time.

(p) Income tax

The income tax expense or tax income for the year comprises current tax and deferred tax.

Current tax is the amount of income taxes payable or recoverable in respect of the consolidated taxable profit or tax loss for the period. Current tax assets or liabilities are measured at the amount expected to be paid to or recovered from the taxation authorities, using the tax rates and tax laws that have been enacted or substantially enacted at the reporting date.

Deferred tax liabilities are the amounts of income taxes payable in future periods in respect of taxable temporary differences. Deferred tax assets are the amounts of income taxes recoverable in future periods in respect of deductible temporary differences, the carryforward of unused tax losses and the carryforward of unused deductions. Temporary differences are differences between the carrying amount of an asset or liability and its tax base.

Current and deferred tax are recognised as income or expense and included in profit or loss for the year, except to the extent that the tax arises from a transaction or event which is recognised, in the same or a different year, directly in equity, or from a business combination.

(i) Recognition of deferred tax liabilities

The Group recognises deferred tax liabilities in all cases except where they arise from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable income.

(ii) Recognition of deferred tax assets

The Group recognises deferred tax assets provided that it is probable that sufficient taxable profit will be available against which they can be utilised or when tax legislation envisages the possibility of converting deferred tax assets into a receivable from public entities in the future. Nonetheless, assets arising from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit nor taxable income, are not recognised.

It is considered probable that the Group will generate sufficient taxable profit to recover deferred tax assets when there are sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity, which are expected to reverse in the same tax period as the expected reversal of the deductible temporary differences or in periods into which a tax loss arising from a deductible temporary difference can be carried back or forward.

Notes to the Consolidated Annual Accounts

(iii) Measurement of deferred tax assets and liabilities

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted. The tax consequences that would follow from the manner in which the Group expects to recover or settle the carrying amount of its assets or liabilities are also reflected in the measurement of deferred tax assets and liabilities.

The Group reviews the carrying amount of deferred tax assets at the year end and reduces this amount to the extent that it is not probable that sufficient taxable profit will be available against which to recover them.

Deferred tax assets that do not comply with the above conditions are not recognised in the Consolidated Statement of Financial Position. At year end the Group reassesses whether conditions are met for recognising previously unrecognised deferred tax assets.

(iv) Offset and classification

The Group only offsets current tax assets and liabilities if it has a legally enforceable right to offset the recognised amounts and intends either to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

The Group only offsets deferred tax assets and liabilities if it has a legally enforceable right to offset the recognised amounts, and they relate to income taxes levied by the same taxation authority on the same taxable entity or on different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Deferred tax assets and liabilities are recognised in the Consolidated Statement Of Financial Position under non-current assets or liabilities, irrespective of the expected date of recovery or settlement.

(v) Consolidated taxation

The Group, which is composed of the companies indicated in Appendix I, files consolidated tax returns.

In addition to the factors to be considered for individual taxation, set out previously, the following factors are taken into account when determining the accrued income tax expense for the companies forming the consolidated tax group:

- Temporary and permanent differences arising from the elimination of profits and losses on transactions between Group companies, derived from the process of determining consolidated taxable income.

Notes to the Consolidated Annual Accounts

- Deductions and credits corresponding to each company forming the consolidated tax group. For these purposes, deductions and credits are allocated to the company that carried out the activity or obtained the profit necessary to obtain the right to the deduction or tax credit.

(q) Classification of assets and liabilities as current and non-current

Assets and liabilities are classified as current when they are expected to be realised or settled in the Group's normal operating cycle, within 12 months after the year end. Otherwise they are classified as non-current.

(r) Environment

The Group takes measures to prevent, reduce or repair the damage caused to the environment by its activities.

Expenses derived from environmental activities are recognised as other operating expenses in the period in which they are incurred. By its nature, the Group's activity does not have a significant impact on the environment and as such no provisions have been recorded for this contingency.

Property, plant and equipment acquired by the Group for long-term use to minimise the environmental impact of its activity and protect and improve the environment, including the reduction and elimination of future pollution from the Group's activities (e.g. the replacement of road surfaces or land related to the laying of pipelines), are recognised as assets, applying the measurement, presentation and disclosure criteria described in Note 3 (d).

(4) Sector Regulation

Separation of regulated and liberalised activities

Article 63 of Hydrocarbon Law 34/1998, of 7 October, establishes the principle of separation of activities between companies carrying out one or more of the regulated activities of regasification, basic storage, transmission and distribution and those carrying out deregulated activities (production or marketing).

This principle, which is incorporated transversally in the energy markets (such as, for example, in the electricity sector), has its origin in the process of market liberalisation initiated in the gas sector by Directive 1998/30/EC and developed by the successive Directives (2003/55/EC and 2009/73/EC). The principle of separation of activities seeks to avoid conflicts of interest between the owners of the infrastructures through which energy is transmitted (regulated activities), and those who produce or market this energy (liberalised activities), while the relationship between both types of activities must be governed by a neutral, transparent and objective third-party access regime established by regulation.

Notes to the Consolidated Annual Accounts

As Spain does not have natural gas fields with a significant capacity, practically all the natural gas consumed has historically been imported from other countries, so that natural gas production activity nationally has been unrepresentative. However, technological developments, environmental objectives at EU level (the REPower EU Plan approved by the European Commission in 2022 includes a target of 35 bcm of biomethane production in the European Union by 2030), and the fact that Spain has been recognised by the European Union as the fifth EU country with the greatest potential for biomethane production, are leading to an exponential deployment of renewable gas production projects that will make it possible to decarbonise consumption supplied from the natural gas grid, taking advantage of the autonomy and security of supply provided by the grid, and without users having to make new investments.

This is why new business opportunities are emerging in the sector, and companies interested in participating in the new production activity must adapt their structures to the aforementioned principle of separation of activities between the regulated activities of regasification, basic storage, transmission and distribution and production.

Natural gas transmission and distribution activities

Directive 98/30/EC of the European Parliament and of the Council, of 22 June 1998, defined the bases of the internal natural gas market, configuring a liberalised market for the supply of natural gas.

Thus, the regulatory framework for the natural gas sector in Spain is based on Hydrocarbon Law 34/1998, in part enacted by Royal Decrees 949/2001 and 1434/2002. The first of these Royal Decrees regulates third-party access to gas facilities and establishes an integrated economic system for the natural gas sector; the second regulates transmission, distribution, trading and supply activities and the authorisation procedures for natural gas facilities.

Over the years, as the sector was gradually liberalised, the aforementioned Hydrocarbon Law was amended on numerous occasions. The most important amendment was pursuant to Royal Decree-Law 8/2014 of 4 July 2014, which approved urgent measures for growth, competitiveness and efficiency and was subsequently passed by the Spanish parliament and published as Law 18/2014 of 15 October 2014, approving urgent measures for growth, competitiveness and efficiency. The law introduced certain measures that update the regulatory-economic framework, the most salient of which are as follows:

- A reform of the general scheme of revenues and costs of the gas system was undertaken, which is based on the principle of economic sustainability and long-term economic balance, taking into account fluctuations in demand and the level of development of existing infrastructure, while sustaining the principle of adequate remuneration for investments in regulated assets, and security of supply. It therefore establishes the principle of economic and financial sustainability of the gas system, such that any legislation leading to a rise in costs or reduction in revenues must include a reduction in costs or an increase in revenues.
- Certain mechanisms were introduced to restrict any annual temporary imbalances in the settlement system, through the automatic review of tolls when certain

Notes to the Consolidated Annual Accounts

thresholds are exceeded. If these thresholds are not exceeded, the imbalances are financed by the parties subject to the settlement system in proportion to their remuneration, generating receivables in the following five years, with a market interest rate set by Ministerial Order.

- With regard to the remuneration of regulated activities, the reform includes the basic principle of considering the necessary costs for an efficient and well-managed company to perform the activity at the lowest cost for the system.
- In line with electricity sector regulations and the need to ensure regulatory stability, regulatory periods of six years were defined, during which the financial rate cannot be reviewed and no automatic update formulas will be applied to the remuneration of any of the activities. However, as the regulatory reform was proposed in a deficit scenario that is expected to be remedied in the coming years, it allows certain remuneration parameters to be adjusted every three years if significant variations arise in the income and expense items.
- An in-depth, standard review (as described in Note 3 (o)) was undertaken of the remuneration from all activities, encompassing all assets, including those already in service.

By means of Spanish Royal Decree-Law 1/2019, a reform of the scope of powers for the gas system was carried out, adapting the powers of the Spanish National Commission on Financial Markets and Competition (hereinafter, "CNMC") to the requirements of EU law in relation to Directives 2009/72/EC and 2009/73/EC of the European Parliament and of the Council, of 13 July 2009, concerning common rules for the internal market in electricity and natural gas. Among these reforms, worthy of mention is the attribution of powers in favour of the CNMC regarding the establishment of methodologies for determining tolls and remuneration of the regulated activities, including the setting of their values. Therefore, as of 2020, the CNMC has the power to establish these issues, while anything regarding the establishment of new methodologies for determining the remuneration of regulated activities were not applicable until 1 January 2021, upon the conclusion of the first 6-year regulatory period that was established in the aforementioned Law 18/2014. In this regard, during 2019 and 2020, the CNMC worked on a series of Circulars that defined the methodologies for remuneration of the regulated activities developed by Redexis in the gas sector (transmission and distribution) and that are applicable as of January 2021 through December 2026. The most relevant Circulars, insofar as they enable the determination of remuneration for the distribution and transmission activity, were as follows:

- Circular 9/2019, of 12 December, of the National Commission on Markets and Competition, regarding the establishment of the methodology for determining the remuneration of natural gas transmission facilities and of liquefied natural gas plants.
- Circular 4/2020, of 31 March, of the National Commission on Markets and Competition, regarding the establishment of the methodology for determining the remuneration of natural gas distribution.

Notes to the Consolidated Annual Accounts

- Circular 8/2020, of 2 December, of the National Commission on Markets and Competition, regarding the establishment of reference unit values for investment, operation and maintenance for the 2021-2026 regulatory period, and the minimum requirements for audits on investments and costs in natural gas transmission facilities and liquefied natural gas plants.

More recently, the 2021-2030 Integrated National Energy and Climate Plan (PNIEC), approved by Resolution of the Council of Ministers on 16 March 2021, despite anticipating a decrease in the final energy consumption in 2030 with respect to the 2015 values (79.2 ktep vs 84.9), projects a stable natural gas consumption within that period, remaining at 13 ktep. All of which confirms the fundamental role of gas in the energy transition process since, in keeping with the PNIEC's target scenario, this would increase from 15.4% in final energy consumption in 2015 to 17.3% in 2030.

A new version of the Integrated National Energy and Climate Plan 2023-2030 was submitted for public consultation in June 2023. The process has allowed stakeholders to submit comments and a new version of the document is expected to be published in June 2024.

Channelled bulk LPG retail marketing activity (LPG pipeline distribution)

The Hydrocarbons Act, in its article 44-2, among the activities related to the supply of liquefied petroleum gases recognises the retail marketing of channelled bulk LPG, understood as the distribution and supply of LPG from one or several tanks by pipeline to more than one supply point, delivered to customers in gaseous phase, and whose consumption is measured by a meter for each of the consumers. Therefore, unlike what is established for the natural gas sector, in this activity the distribution and supply are carried out by the same agent and it is specifically called "retail marketing of channelled bulk LPG" (or, more simplified, "pipeline LPG distribution").

This is an activity in which both the sale price to end users (consisting of a fixed term €/month and a variable term c€/kg) and the acquisition or purchase price of LPG from wholesale marketers (c€/kg) are regulated, which are updated each month based on the Order of 16 July 1998 of the Ministry of Industry and Energy, which updates the marketing costs of the system for automatic determination of maximum pre-tax sale prices of liquefied petroleum gases and by which certain supplies are liberalised, and based on Order ITC/3292/2008 of 14 November, which modifies the automatic pre-tax sale tariff determination system of pipeline liquefied petroleum gases.

The pipeline LPG distribution activity is subject to a specific Regulation contained in Royal Decree 1085/1992. However, since it is ultimately the supply of fuel gases by pipeline, this activity is subject to the same technical distribution and use regulations as natural gas distribution, which were approved by Royal Decree 919/2006. So much so that this activity is subject to many of the rights and obligations of the natural gas distribution activity, such as the facility construction and maintenance requirements, the receipt of registration fees in payment for the incorporation of new supply points, or the establishment of a completely identical framework of rights and obligations for the periodic inspection of the reception facilities.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

(5) Segment reporting

CNMC Circular 1/2015 establishes a new regulatory reporting system for costs, aimed primarily at the regulated activities of transmission, regasification, storage and technical management of the natural gas system.

While the detailed information furnished makes reference to the transmission activity, global amounts that make reference to the rest of the activities are also indicated: natural gas distribution, transmission of natural gas, LPG distribution and other activities.

These activities will be assigned the revenues and costs directly attributable to them. Overheads that cannot be directly attributed to a specific activity will be allocated to final activities based on the allocation criteria in Circular 1/2015. The Group has developed an allocation model based on profit centres, which are divided into final and allocable.

The accounting policies of the segments are as described in Note 3.

The assets, liabilities, income and expenses presented in this note by segment/activity include the synergies and economies of scale generated within the Group as a result of its integrated management.

Had the segment or activity costs been managed independently, they would have been slightly higher than the figures reflected.

However, a complete and in-depth analysis of the revenue and costs of the transmission activity will be performed when the regulatory cost reporting is submitted to the CNMC.

The most significant segment details are as follows:

	31/12/2023				
	Thousands of Euros				
	Distribution	Transmission	LPG	Other activities	Consolidated
Goodwill	54,432	164,440	303	9,374	228,549
Non-current assets	1,137,250	523,107	172,099	46,707	1,879,163
Current assets	93,363	50,793	24,660	25,612	194,428
Total assets	1,285,045	738,340	197,062	81,693	2,302,140
Non-current liabilities	948,089	471,083	138,474	34,758	1,592,404
Current liabilities	89,672	11,043	12,821	11,759	125,295
Total liabilities	1,037,761	482,126	151,295	46,517	1,717,699

(6) Subsidiaries

(a) Composition of the Group

Appendix I contains information on the subsidiaries included in the Group's consolidation and Appendix II contains information on the related companies included in the Group's scope of consolidation whose evaluation is detailed below:

	Thousands of Euros
	2023
Biored Cella, S.L.	249,849
Biored Vegas Altas, S.L	3,000
H2 Duero, S.L.	400,000
Energygreen Gas Almazán, S.L.	1,779,829
	2,432,678

(b) Non-Controlling interests

Non-controlling interests reflect the 0.02% equity investment in Redexis Gas Murcia, S.A. and the 25% equity investment in Eficiencia y Red Solar, S.L.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

(c) Related companies

Redexis Gas Finance, B.V. was incorporated on 10 March 2014 in the Netherlands and at 31 December 2023 is an investee of Guotong Romeo Holdings Limited, Chase Gas Investments Limited and Arbejdsmarkedets Tillægspension (ATP) (same shareholders as the Parent). Its principal activity is the issue of debt.

All debt issues made by Redexis Gas Finance, B.V. are guaranteed by the Parent, and the funds obtained from the issues were transferred to the Parent by means of loans with the same maturity dates as the debt issued.

The amount of the loans received by the Parent at 31 December 2023 and 2022 is Euros 1,000,000 thousand, and this is the same amount as the one guaranteed by the Parent for the Redexis Gas Finance, B.V. issues. The list of these loans is itemised in Note 19.

The Redexis Foundation was incorporated on 12 July 2019 and its purpose, in general, is the promotion of technological innovation and the development of social, charity, assistance, training or cultural works. Specifically, the Foundation promotes the development and well-being of the social groups that exist in the territories where the Redexis Group operates, with special consideration given to promoting infrastructures that contribute to a sustainable development and cleaner economy. 4.

Redexis Energía, S.A. is the sole shareholder of the Parent and was incorporated with limited liability under Spanish law in Madrid on 20 December 2023. Its registered office is located at calle Mahonia no. 2, 28043 Madrid (Spain) and its main corporate purpose is the holding, purchase, subscription, exchange and sale of domestic and foreign securities, on its own account and without intermediary activity, for the purpose of controlling, administering and managing these companies.

(7) Property, plant and equipment

Details of property, plant and equipment and movement during the years ended 31 December 2023 and 2022 are as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

The majority of the additions taking place in 2023 and 2022 are from the organic growth of the Group by means of the extension of distribution networks, in new municipalities as well as in locations already served by the Group.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

In addition, worthy of note are the corporate transactions for the integration of LPG networks and facilities that are described below:

- On 7 June 2022 a framework agreement was signed between Gas Extremadura Red GLP, S.L.U. and Redexis for the purchase and transfer to Redexis of LPG facilities, and for the sale and transfer to Gas Extremadura of other LPG facilities, for a total of approximately 713,464 Euros for the purchase and 47,523 Euros for the sale, with the result that Redexis provides service to approximately 808 supply points. This transaction was approved in 2022, with the effective transfer of assets taking place in its entirety during 2023.
- At 30 December 2021, Cepsa Comercial Petróleo, S.A.U., GASIB Sociedad Ibérica de Gas Licuado, S.L.U. and Redexis entered into a framework agreement for the purchase and conveyance of LPG networks and facilities serving around 2,295 supply points, for approximately Euros 1,565 thousand. This transaction was approved in 2022, with the effective transfer of the assets taking place for the most part during 2023.
- At 16 December 2021 several companies of the Nedgia Group and Redexis entered into a framework agreement for the purchase and conveyance of LPG networks and facilities serving around 14,450 supply points, for approximately Euros 19,998 thousand. This transaction was approved by the CNMC, and all of the assets were transferred in 2022 and 2023.
- On 28 December 2020, Repsol Butano, S.A. and the Group entered into a framework agreement for the purchase and conveyance of LPG networks and facilities serving around 4,230 thousand supply points, for approximately Euros 4,838 thousand. The effective transfer of all assets took place in 2023.

At 31 December 2023, "property, plant and equipment under construction and advances" reflects investments in gas transmission and distribution networks that the Group expects to complete in the coming months.

At 31 December 2023, the Group has recognised gas plant dismantling costs of Euros 53 thousand under Technical installations and machinery (Euros 53 thousand at 31 December 2022). These expenses were determined based on the Group's best estimate of the market costs of the various physical units involved in dismantling these plants.

The Group has taken out insurance policies to cover the risk of damage to its property, plant and equipment. The cover provided by these policies is considered sufficient.

The cost of fully depreciated property, plant and equipment in use at 31 December 2023 and 2022 is as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Thousands of Euros

Net carrying amount at 31 December 2022	542,914	219,175	12,475	6,378	780,942

The volume of additions for the investment in IT applications in 2023 and 2022 comes from system and software implementation projects, as well as evolutionary improvements to corporate systems.

The additions to goodwill correspond to the difference between the consideration paid and the fair value of the assets and liabilities acquired from the company Galivi Solar, S.L. The Group is analysing the allocation of goodwill that will be carried out within the one-year period, as established by IFRS 3.

The goodwill arising on the business combination carried out in 2010, amounting to Euros 213,053 thousand (subsequently reduced by Euros 1,584 thousand), and that generated on the business combination carried out in 2015 amounting to Euros 7,706 thousand, are essentially based on the future profits from the ordinary activities of the Parent Company and the companies Redexis Gas Infraestructuras, S.L.U. and Redexis Gas Murcia, S.A., which fail to meet the conditions to qualify for recognition as a separate asset.

Details of the allocation of goodwill at 31 December 2023 and 2022, by cash-generating unit (CGU), are as follows:

	Thousands of Euros	
	2023	2022
Gas distribution	54,432	54,432
Gas transmission	164,440	164,440
LPG	303	303
Biogas	9,374	-
	228,549	219,175

A summary of the CGUs to which intangible assets with indefinite useful lives, namely licences for gas distribution and transmission, have been allocated at 31 December 2023 and 2022 is as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Thousands of Euros	
	2023	2022
Gas distribution	333,493	333,493
Gas transmission	209,421	209,421
	542,914	542,914

The cost of fully amortised intangible assets in use at 31 December 2023 and 2022 is as follows:

	Thousands of Euros	
	2023	2022
Computer software	43,404	36,674
Other intangible assets	1,114	1,023
	44,518	37,697

(9) Right of use assets and lease liabilities

Details and movement in the accounts included in the right of use assets by classes during the years ended at 31 December 2023 and 2022 are as follows:

	Thousands of Euros

The Group performs a large part of its activities in properties and facilities leased from third parties. The leases are negotiated with several renewal and cancellation options for flexibility depending on how the business responds in each area. The contracts expose the Group to a certain variability, albeit limited, due to the fact that the majority of these is CPI-linked.

Subsoil occupancy rates for the gas distribution activity are likewise included as well as the charges for subsoil occupancy for the gas transmission activity (under "Subsoil Use"), and those leases of land for facilities belonging to the Group (under "Lands").

In addition, the Group has short-term lease contracts, for which it has recorded an expense in the amount of Euros 269 thousand (Euros 513 thousand in the previous year) (Note 30).

The details and relevant amounts of lease contracts by asset type at 31 December 2023 and 2022 are as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

From four to five years	575	568
Over five years	2,484	2,652
	8,807	8,695

The are no commitments deriving from short-term lease contracts.

(10) Impairment and Allocation of Goodwill and Intangible Assets with Indefinite Useful Lives to CGUs

For impairment testing purposes, goodwill and intangible assets with indefinite useful lives have been allocated to the Group's cash-generating units (CGUs) as detailed in Note 8.

The recoverable amount of a CGU is determined based on calculations of its fair value less costs of disposal. These calculations include estimated cash flow projections, less the post-tax average cost of the capital itself from the underlying CGU activity. The economic forecasts start from the best estimate by management of the evolution of the CGU business for a projection period of 15 years, and assume a terminal value upon its conclusion with a perpetual growth rate (g) of 1.5%.

For the natural gas distribution and transmission activity, a post-tax average cost of capital calculated in accordance with CNMV Circular 2/2019, of 12 November, was used to establish the methodology for calculation of financial remuneration rate of the transmission and distribution activities of electric power, and the regasification, transmission and distribution of natural gas.

The Group determines budgeted gross margins based on past experience and forecast market performance. The weighted average growth rates are consistent with the forecasts included in sector reports. The discount rates used are after-tax values and reflect specific risks related to each CGU.

According to the projections and estimates available to the Company (which include the considerations of the 2021-2030 Integrated National Energy and Climate Plan - PNIEC), the cash flow forecasts attributable to the CGUs to which goodwill and various intangible assets with indefinite useful lives have been allocated make it possible to recover the value of goodwill and intangible assets with indefinite useful lives recognised at 31 December 2023.

A sensitivity analysis to the assumption of the average cost of after-tax capital in a projection period of 15 years shows that, for the natural gas distribution activity, a sign of impairment of goodwill and intangible assets with indefinite lives would only exist if the

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

perpetual growth rate (g) was -7.7% or lower; in the case of the activity of transmission of natural gas, for a sign of impairment to exist the rate (g) would have to fall to -2% or lower.

(11) Financial Assets by Category and Class

The classification of financial assets by category and class, is as follows:

	Thousands of Euros			
	Non-current		Current	
	2023	2022	2023	2022
Financial assets at amortised cost				
Loans	27	27	104	110
Security and other deposits delivered	1,642	1,461	-	-
Other financial assets	63	65	-	-
Shareholdings accounted for by the equity method	2,433	-	-	-
Trade and other receivables				
Trade receivables	9,849	6,133	38,376	39,627
Other receivables	155	1,766	51,275	25,430
Impairment	-	-	(2,016)	(1,306)
Cash and cash equivalents	-	-	92,302	81,102
Total financial assets	14,169	9,452	180,041	144,964

The amount of net profits and losses, corresponding to the category of financial assets at amortised cost in the years 2023 and 2022 is as follows:

	Thousands of Euros	
	2023	2022
Finance income at amortised cost	12	16
Reversal/(Losses) for impairment (Notes 15 and 30)	(824)	51
	(81)	67

(12) Current and Non-Current Financial Assets

Details of current and non-current financial assets at 31 December 2023 and 2022 are as follows:

	Thousands of Euros			
	2023		2022	
	Non-current	Current	Non-current	Current
Security deposits paid	1,642	-	1,461	-

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

Loans to employees and other	27	104	27	110
Other financial assets	63	-	65	-
Total	1,732	104	1,553	110

Security deposits paid correspond essentially to the balances lodged with the Autonomous Regions, deriving from deposits received from customers when a service is arranged, by virtue of the provisions of applicable legislation in force at any given time. These security deposits are maintained for as long as the Group maintains the supply contract with the customer or if the customer maintains the agreement with its supplier, and its distribution company is a Group company.

(13) Income tax

At the Shareholders General Meeting held on 17 December 2010 the Parent Company shareholders agreed that, with effect as of 1 January 2011, the Company would apply the consolidated taxation regime regulated in Title VII, Chapter VII of the now repealed Royal Legislative Decree 4/2004, of 5 March, replaced by Title VII, Chapter VI of Law 27/2014, of 27 November, approving the Corporate Income Tax Law. Redexis, S.A.U. is the Parent company of a new tax group also made up of the subsidiaries detailed in Appendix I attached.

Details of deferred tax assets and liabilities by type of asset and liability are as follows:

	2023		
	Thousands of Euros		
	Assets	Liabilities	Net
Property, plant and equipment	1,639	(28,943)	(27,304)
Goodwill	-	(11,934)	(11,934)
Deferred income	-	(1,630)	(1,630)
Intangible assets	-	(68,266)	(68,266)
Provisions	52	-	52
Amortisation and depreciation	857	-	857
Personnel remuneration	1,107	-	1,107
Tax loss carryforwards	310	-	310
Net assets and liabilities	3,965	(110,773)	(106,808)

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	2022		
	Thousands of Euros		
	Assets	Liabilities	Net
Property, plant and equipment	1,614	(30,291)	(28,677)
Goodwill	-	(10,335)	(10,335)
Deferred income	-	(1,959)	(1,959)
Intangible assets	-	(66,942)	(66,942)
Provisions	232	-	232
Amortisation and depreciation	1,519	-	1,519
Personnel remuneration	1,033	-	1,033
Net assets and liabilities	4,398	(109,528)	(105,130)

There are no unrecorded deferred tax assets or liabilities.

Deferred tax liabilities relating to property, plant and equipment mostly derive from the application of the tax incentive approved in additional provision 11 of Law 4/2008 of 23 December 2008 and in Royal Decree-Law 13/2010 of 3 December 2010, on accelerated depreciation of property, plant and equipment, which the Group applied in 2009, 2010 and 2011, as well as from the fair value measurement of property, plant and equipment in the business combinations in 2010 and 2015.

Accelerated depreciation is only applied to investments brought into service in the 2009, 2010 and 2011 tax periods that correspond to new assets commissioned under works execution contracts or investment projects with an execution period, in both cases, of less than two years between the commission or investment start date and the date on which the asset becomes available or enters service. Investments in distribution assets are depreciated over a period of 20 years for accounting purposes and one year for tax purposes. Investments in transmission assets are depreciated over a period of 40 years for accounting purposes and one year for tax purposes.

All deferred tax liabilities associated with intangible assets and deferred income derive from the aforementioned business combinations.

The merger approved by the shareholders in 2014, detailed in the accounts for the mentioned year, became effective for accounting purposes on 1 January 2014. The Group therefore reversed the deferred tax liability in the amount of Euros 80,748 thousand in the Consolidated Income Statements for 2014. The merger was carried out under the special protection tax regime contained in Chapter VII of Title VII of the Spanish Corporate Income Tax Law and, therefore, the tax value of the property, plant and equipment, intangible assets and goodwill at 1 January 2014 was Euros 23,846 thousand, Euros 245,314 thousand and Euros 6,030 thousand, respectively. The tax effects occur as of when the merger was entered in the Mercantile Registry on 27 February 2015.

On 23 December 2015, the Parent Company requested a ruling from the Directorate-General of Taxes as to whether the tax loss carryforwards of the absorbed subsidiaries (Redexis Gas Transportista and Redexis Gas Distribución), arising from temporary

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

differences to be reversed in the future, should be calculated as a reduction in the deductible merger difference, as was the case with the accelerated depreciation applied by these companies in 2009, 2010 and 2011. On 26 December 2016, the Parent Company received a positive response to its query, stating that the tax loss carryforwards of the absorbed subsidiaries arising from temporary differences to be reversed in the future should not be calculated as a reduction in the deductible merger difference. As a result, the tax value of intangible assets and goodwill in 2016 increased by Euros 29,525 thousand and Euros 45,098 thousand, respectively. In 2016 the Group therefore reversed the Euros 7,441 thousand deferred tax liability in the Consolidated Income Statements.

The tax value of intangible assets and goodwill in 2017 increased by Euros 43,031 thousand and Euros 75,253 thousand respectively. The Parent Company obtained a tax certificate corresponding to the former Company shareholder, which reveals the capital gain included in the Seller's tax base, the resulting double taxation of the transferring shareholder Endesa Gas, and of the purchasing company Redexis. The aforementioned capital gain could be eliminated by application of paragraph 5 of Transitory Provision 23 of Corporate Income Tax Law 27/2014.

Pursuant to Law 16/2012 of 27 December 2012, which introduced several tax measures to consolidate public finances and boost economic activity, depreciation of property, plant and equipment and amortisation of intangible assets was limited to 70% of the depreciation and amortisation charge for accounting purposes for the 2013 and 2014 tax periods. Consequently, the Group has recognised deferred tax assets of Euros 674 thousand at 31 December 2023 (Euros 1,157 thousand at 31 December 2022). As of 2015, any depreciation and amortisation that was not deducted for tax purposes in the tax periods commenced in 2013 and 2014, due to the aforementioned limit, may be deducted on a straight-line basis over a period of 10 years, or over the useful life of the assets. The Parent Company has opted for the 10-year reversal period.

In accordance with legislation in force, the Group may offset its tax loss carryforwards up to a maximum of 25% of taxable income before the offset. In the calculation of corporate income tax for 2022, the tax Group offset all tax loss carryforwards in an amount of Euros 971 thousand.

With effect from tax periods beginning in 2023, the taxable income of the tax group will be determined by taking into account only 50 per cent of the individual tax losses of each of the entities comprising the tax group.

With effect for subsequent tax periods, the amount of the individual losses not included in the taxable income of the tax group due to the application of the aforementioned measure will be included in the taxable income of the tax group in equal parts in each of the first ten tax periods beginning on or after 1 January 2024, as a result of which the group has recorded a deferred tax asset amounting to Euros 312 thousand.

In the event of loss of the consolidated taxation regime or termination of the tax group, the amount of the individual tax losses pending inclusion in the taxable income of the group will be included in the last tax period in which the group is taxed under the consolidated taxation regime.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

Based on the best estimate of future consolidated profits, recovery of the deferred tax assets is considered probable and they have therefore been recognised in the consolidated statement of financial position.

Corporate Income Tax Law 27/2014 of 27 November 2014 amended the income tax rate. The tax rate is 25% for periods commencing on or after 1 January 2016, and for 2015 it was 28%. The Group adjusted all of its deferred tax assets and liabilities based on a tax rate of 25%, except for deferred tax assets arising from non-deductible amortisation and depreciation in view of the application of Law 16/2012 of 27 December 2012. In this respect, Transitory Provision 37 of the CIT Law provides for a deduction in total income tax of 5 % of the amounts included in taxable income for the tax period, for depreciation and amortisation not deducted in tax periods starting in 2013 and 2014. This deduction was 2% for the tax periods commencing as of 2015.

There are no items charged or credited directly against other overall income and net equity in 2023 and 2022.

Details of the income tax expense are as follows:

	Thousands of Euros	
	2023	2022
Current tax for the year	4,444	8,067
Adjustment of prior years	(436)	527
Deferred tax		
Origination and reversal of temporary differences	(3,596)	(3,271)
Accelerated depreciation and amortisation	(1,454)	(1,454)
Depreciation and amortisation	720	681
Salaries payable	(1)	366
Goodwill	(2,486)	(2,486)
Provisions	(375)	(378)
Income tax expense for the year (companies)	412	5,323
Adjustments and eliminations on consolidation	4,945	4,911
Income tax expense for the year (Group)	5,357	10,235

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

A reconciliation of current tax with current income tax liabilities is as follows:

	Thousands of Euros	
	2023	2022
Current tax	4,444	8,067
Tax loss carryforwards offset and recognised in prior years	311	(243)
Income tax payable for the year (Group)	4,755	7,825
Payments on account during the year	(3,320)	(6,015)
Current income tax liability	1,435	1,810

The relationship between the income tax expense and pre-tax profit for the year is as follows:

	Thousands of Euros	
	2023	2022
Profit for the year before tax	22,997	38,598
Tax at 25%	5,749	9,649
Adjustment of prior years	(436)	527
Other net movements	44	59
Income tax expense for the year (Group)	5,357	10,235

In accordance with current legislation, taxes cannot be considered definitive until they have been inspected by the taxation authorities or before the inspection period of four years has elapsed.

In 2020 the Tax Authorities commenced an audit of the following companies of the group, for the years and taxes set forth below:

<u>Tax</u>	<u>Years open</u>
Corporate Income Tax (All Group companies*)	2015 – 2018
Value Added Tax (Redexis, S.A.U.)	2017 – 2018
Non-Resident Income Tax (Redexis, S.A.U.)	2016 – 2019

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

The audit actions were finalised during 2022. As regards corporate income tax, the Tax Authorities issued a settlement to increase the payment of Euros 1,109 thousand plus default interest for the years 2015-2018 for some deductions corresponding to technological innovation, research and development expenses the Group had applied, and that the auditors did not consider appropriate.

They proceeded with the aforementioned regularisation and corresponding record of compliance, imposing no fine whatsoever.

As regards the rest of the taxes and years under inspection, the result of the audit actions was verified and accepted for all companies of the Group.

The Group has open to inspection by the taxation authorities the main taxes applicable for the following years:

<u>Tax</u>	<u>Years open</u>
Corporate Income Tax (*)	2019 – 2022
Value Added Tax (**)	2019 – 2023
Personal Income Tax	2019 – 2023
All other applicable Taxes	2019 – 2023

(*) The period for filing corporate income tax is within 25 calendar days following six months after the end of the year, whereby the Corporate Income Tax corresponding to 2023 will not be open to inspection until 25 July 2024.

Nevertheless, the right of the taxation authorities to inspect or investigate unused or offset tax loss carryforwards, and unused or applied deductions to promote the undertaking of certain activities, have a 10-year statute of limitations as of the day after the end of the period for filing the tax return or self-assessment corresponding to the tax period in which the right to offset or application was generated. Following that period, the Group should accredit any tax loss carryforwards or deductions by disclosing the settlement or self-assessment and the accounting records, with proof that they were filed at the Mercantile Registry within the above period.

Due to different possible interpretations of prevailing tax legislation, additional tax liabilities could arise in the event of inspection. In any case, the Parent's directors do not consider that any such liabilities that could arise would have a significant effect on the Consolidated Annual Accounts.

(14) Inventories

Details of Inventories are as follows:

	<u>Thousands of Euros</u>	
	<u>2023</u>	<u>2022</u>
LPG inventories	8,443	9,941
Solar Panels	3,090	2,699

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

Other	88	218
Supplier advances	1,486	491
	<u>13,107</u>	<u>13,348</u>

At 31 December 2023 and 2022, the Group had no commitments to purchase or sell inventories.

(15) Trade, other receivables and other current assets

Details of trade and other receivables and other assets are as follows:

	Thousands of Euros			
	2023		2022	
	Non-current	Current	Non-current	Current
Trade receivables	9,849	38,376	6,133	39,627
Receivables, settlements pending	155	49,826	1,766	23,411
Other receivables	-	1,449	-	2,019
Less impairment due to uncollectibility	-	(2,016)	-	(1,306)
Total trade and other receivables	10,004	87,635	7,899	63,751

	Thousands of Euros	
	2023	2022
Public entities balances receivable		
Taxation authorities, recoverable VAT	503	1,216
Taxation authorities, withholdings	106	28
Other	155	415
Prepayments	516	511
Total other assets	1,280	2,171

Trade receivables primarily comprise balances receivable from suppliers of natural gas for tolls invoiced and propane gas invoiced to end customers. In the case of non-current, they come from sales with deferred payment of energy facilities for third parties.

Current and non-current receivables recorded under debtors, settlements receivable reflect settlements and measurement differences receivable from the gas system.

Movement in impairment due to uncollectibility is as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Thousands of Euros	
	2023	2022
Balance at 1 January	(1,306)	(1,532)
Impairment charge	(871)	(330)
Reversals for impairment	47	381
Business combination additions (Galivi)	(65)	-
Cancellations	179	175
Balance at 31 December	(2,016)	(1,306)

At 31 December 2023 and 31 December 2022 there are no past-due unimpaired trade receivables corresponding to balances with Public Entities, for which no credit risk is foreseen.

(16) Cash and cash equivalents

Details of cash and cash equivalents are as follows:

	Thousands of Euros	
	2023	2022
Cash in hand and at banks	92,302	81,102
	92,302	81,102

(17) Equity

Details of equity and movement during the year are shown in the consolidated statement of changes in equity.

(a) Capital

At 31 December 2023 and 2022, the share capital of the Parent Company amounted to Euros 100,000 thousand, represented by 10,000,000 shares of Euros 10 par value each, subscribed and fully paid.

At 31 December 2023, Redexis, S.A.U. is wholly owned by Redexis Energía, S.A. At 31 December 2022, Redexis, S.A.U. was owned (i) 33.33% by Chase Gas Investments Limited, a subsidiary of the USS private equity fund; (ii) 33.34% by Arbejdsmarkedets Tillægspension (ATP) private equity fund; and (iii) 33.33% by Guotong Romeo Holdings Limited, a company owned by the funds Guoxin Guotong Fund LLT and CNIC Corporation Limited.

The Group actively manages its capital to maintain a structure capable of creating value for its shareholders and other stakeholders, as well as optimising the cost of this, always safeguarding the principle of going concern.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

The Group has several levers that allow it to adjust its capital structure. These range from the discretionality in the payment of dividends and in making investments for its organic growth, through the amortisation of debt, issue of shares or sale of assets.

In order to monitor and achieve these objectives, the Group maintains a prudent financial policy that specifies a commitment to maintain an investment grade rating, in other words, BBB- or greater by Standard & Poor's rating agency or any other agency with which the Group maintains a rating request. This entails the fulfilment of a series of leverage ratios and cash generation in accordance with that rating.

(b) Share premium

This reserve, amounting to Euros 105,433 thousand at 31 December 2023 and 2022, is freely distributable, provided that its distribution would not reduce the Parent's equity to an amount lower than share capital.

(c) Other reserves

Details of "Other reserves" are as follows:

	Thousands of Euros	
	2023	2022
Legal reserve	20,000	20,000
Other shareholder contributions	67,538	67,538
Other reserves	273,803	245,441
	361,341	332,979

Legal reserve

The legal reserve has been appropriated in compliance with article 274 of the Revised Spanish Companies Act, which requires that companies transfer 10% of profits for the year to a legal reserve until this reserve reaches an amount equal to 20% of share capital.

The legal reserve is not distributable to shareholders and if it is used to offset losses, in the event that no other reserves are available, the reserve must be replenished with future profits.

At 31 December 2023 and 2022, the Parent had appropriated to this reserve the minimum amount required by law, i.e. Euros 20 million (20% of share capital), and will therefore not allocate any further amounts to this reserve.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

Other reserves

The goodwill reserve was appropriated in compliance with article 273.4 of the Revised Spanish Companies Act, which required companies to constitute a non-distributable reserve equal to the amount of goodwill recognised in the Parent's individual statement of financial position. However, the amendment to article 39.4 of the Spanish Code of Commerce in 2016 provided for the systematic amortisation of goodwill (in Annual Accounts prepared under Spanish GAAP), thus eliminating the obligation to appropriate this reserve.

At 31 December 2023 and 2022, other reserves include goodwill reserves amounting to Euros 16,356 thousand, which are non-distributable until the carrying amount of goodwill is lower than the amount of this reserve in the annual accounts of each Group company.

Details of reserves contributed by each Group company at 31 December 2023 and 2022 are as follows:

	Thousands of Euros	
	2023	2022
Redexis, S.A.U.	357,397	329,871
Redexis Gas Murcia, S.A.U.	6,380	4,026
Redexis Gas Servicios, S.L.U.	(1,340)	(1,077)
Redexis GLP, S.L.U.	(6,916)	(5,523)
Redexis Infraestructuras, S.L.U.	5,819	5,681
	361,341	332,979

(d) Dividends

During 2023 the Parent did not pay dividends to its shareholders (30,000 thousand Euros in 2022).

(e) Profit/loss for the year

Details of profit/(loss) for the year contributed by each Group company at 31 December 2023 and 2022 are as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Thousands of Euros	
	2023	2022
Redexis, S.A.U.	23,117	27,525
Redexis Gas Servicios, S.L.U.	(510)	(262)
Redexis GLP, S.L.U.	(800)	(1,393)
Redexis Gas Murcia, S.A.U.	2,914	2,354
Redexis Infraestructuras, S.L.U.	(7,672)	138
Galivi Solar, S.L.U.	616	-
Energy Green Gas Almazán, S.L.	(25)	-
	17,640	28,362

(18) Financial Liabilities by Class and Category

(a) Classification of financial liabilities by category

A classification of financial liabilities by category and class is as follows:

	Thousands of Euros	
	2023	
	Carrying amount Non-current	Carrying amount Current
Financial liabilities at amortised cost		
Debt with related companies	995,657	12,455
Loans and borrowings		
Variable rate	225,223	2,021
Fixed rate	227,477	18,807
Security and other deposits received	875	-
Payables transformable into subsidies	1,661	-
Other financial liabilities	-	3,552
Lease liabilities	6,761	2,046
Total financial liabilities	1,457,654	38,881

REDEXIS, S.A.U. AND SUBSIDIARIES
Notes to the Consolidated Annual Accounts

	Thousands of Euros	
	2022	
	Carrying amount Non-current	Carrying amount Current
Financial liabilities at amortised cost		
Debt with related companies	993,746	12,489
Loans and borrowings		
Variable rate	223,036	244
Fixed rate	247,158	11,543
Security and other deposits received	872	-
Payables transformable into subsidies	1,161	-
Other financial liabilities	-	2,396
Lease liabilities	6,723	1,972
Total financial liabilities	1,472,695	28,644

The fair value of loans and borrowings with related companies at 31 December 2023 is Euros 958,530 thousand (Euros 920,900 thousand at 31 December 2022). For the rest of the liabilities, the fair value is similar to the carrying amount

The average interest rate of these debts with related companies and bank borrowings is 1.96% (1.95% in 2022).

Security deposits received essentially correspond to the deposits received from customers when a service is arranged, by virtue of the provisions of applicable legislation in force at any given time. These security deposits are maintained for as long as the Group maintains the supply contract with the customer or if the customer maintains the agreement with its supplier, and its distribution company is a Group company.

(b) Net losses and gains by financial liability category

Net losses and gains by financial liability category for 2023 comprise finance costs at amortised cost totalling Euros 35,804 thousand (Euros 28,907 thousand in 2022).

(c) Changes in Liabilities arising from Financing Activities

The reconciliation of liabilities classified as financing activities is as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Thousands of Euros			
	Debt with related companies	Loans and borrowings	Lease liabilities	Total
Balance at 31 December 2021	991,885	414,165	11,765	1,417,815
Cash flows	-	66,884	(2,207)	64,677
Other changes	1,861	(1,443)	(863)	(446)
Balance at 31 December 2022	993,746	479,605	8,695	1,482,046
Cash flows	-	(7,682)	(2,061)	(9,743)
Other changes	1,912	2,957	2,173	7,041
Balance at 31 December 2023	995,657	474,880	8,807	1,479,343

(19) Debt with related companies

As indicated in Note 6c, at 31 December 2023 the Parent was extended a series of loans by related party Redexis Gas Finance, B.V. in a nominal amount of Euros 1,000,000 thousand at 31 December 2023 and 2022.

The origin of these loans are the issues of debt made by Redexis Gas Finance, B.V. All issues are guaranteed by Redexis, S.A.U. and the funds obtained from the issues were transferred to the Parent by means of said loans.

The list of loans at the close of 2023 and 2022 is as follows:

Years 2023 and 2022

Issue date	Term (years)	Maturity	Coupon	Nominal
27/04/2015	12	27/04/2027	1.99%	250,000
01/12/2017	9 and 5 months	27/04/2027	1.99%	250,000
28/05/2020	5	28/05/2025	1.91%	500,000
				1,000,000

No transactions were performed in 2023, as in 2022.

Accrued interest not yet due at 31 December 2023 and 2022 is reflected under "Loans and Borrowings with Related Companies" under current liabilities in the Consolidated Statement Of Financial Position.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

(20) Loans and Borrowings

Details on loans and borrowings at 31 December 2023 and at 31 December 2022 are as follows:

- EIB loan 2018	2040	75,000	841	75,000
- ESG linked - New Term Loan	2027-2029	300,000	181	224,016
		856,765	11,787	470,194

(1) Commitment fee.

(2) Outstanding depreciable expenses

The maturity by year of the loans is:

At 31 December 2023:

	2024	2025	2026	2027	2028 and thereafter	Total
EIB	16,765	16,765	16,765	16,765	177,352	244,412
TERM LOAN	-	-	-	-	225,000	225,000
REST	1,863	1,261	426	153	-	3,703
TOTAL	18,628	18,026	17,191	16,918	402,352	473,115

In 2023, the most relevant financing operations were as follows:

- In June 2023, the Parent unilaterally waived the right to draw down the Euros 75,000 thousand available under the Term Loan financing formalised in June 2022, leaving Euros 225,000 thousand actually drawn down.

In 2022 the following financing transactions took place:

- In June 2022 the Parent formalised a Term Loan with several Spanish and international institutions in an amount of Euros 300,000 thousand for a term of 5 years, with two optional one-year extensions, and that would reach maturity in 2029. The funds have been allocated to the operational requirements of the Group's business, including the early termination of the Term Loan formalised in May 2020 with a maturity in 2023. Euros 225 million of this loan were drawn, with

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

the ability to draw the rest until June 2023 at the Group's discretion and with no type of restriction or condition.

(21) Trade and other payables

Details of trade and other payables are as follows:

	Thousands of Euros	
	2023	2022
Suppliers	8,056	9,575
Trade payables	16,990	17,971
Payables, settlements pending	26,674	11,704
Salaries payable	2,707	2,686
Payables for acquisition of non-current assets	26,572	39,246
Total trade and other payables	80,999	81,183

	Thousands of Euros	
	2023	2022
Public entities, other		
tax		
Taxation authorities, personal income	339	373
Social Security payables	454	452
Taxation authorities, personal VAT tax	342	71
Public utility rates, taxes and local council payables	2,845	2,574
Total other liabilities	3,980	3,470

Payables, settlements pending at 31 December 2023 primarily include the balances related to provisional settlements pending final settlement by the regulatory body for 2021, 2022 and 2023 (for the years 2020, 2021 and 2022 at 31 December 2022).

Payables for acquisition of non-current assets at 31 December 2023 and 2022 mainly reflect payables for acquisitions of property, plant and equipment, primarily for the extension of distribution networks.

(22) Late Payments to Suppliers. Additional Provision 3 of Spanish Law 18/2022, of 28 September.

Details of late payments to suppliers by Spanish consolidated companies are as follows:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	2023	2022
	Days	
Average supplier payment period	41	45
Transactions paid ratio	42	47
Transactions payable ratio	34	35
	Amount (thousands of Euros)	
Total payments made	198,976	198,874
Total payments outstanding	20,194	33,384

To calculate the average period of payment to suppliers, the commercial operations corresponding to the delivery of goods or provision of services accrued in each year were taken into account.

Trade and other payables for debts with suppliers of goods or services, included in the item "Trade and other payables" of the current liabilities of the balance sheet are considered suppliers exclusively for the purposes of providing the information set out in this Resolution, regardless of any financing for advance collection from the supplier.

"Average payment period to suppliers" is understood as the term that elapses from the receipt of the goods or the provision of services by the supplier and the material payment of the operation.

The following is the breakdown of the monetary volume and number of invoices paid within the legal period established.

	2023	2022
Monetary volume (thousands of Euros)	193,652	178,302
<i>Percentage of the total payments made</i>	87%	89%
Number of invoices	44,772	32,462
<i>Percentage of the total invoices</i>	83%	84%

According to Law 3/2004, of December 29, which establishes measures to combat late payment in commercial transactions, modified in turn by Article 33 of Law 11/2013, of July 26, on measures to support entrepreneurs and stimulate growth and job creation, the maximum legal payment period applicable to the Company in the year 2023 is 30 days, unless agreed otherwise between the parties and extended up to a maximum of 60 days.

(23) Risk Management Policy

Financial risk factors

The Group's activities are exposed to various financial risks: market risk (including fair value interest rate risk and price risk), credit risk, liquidity risk, and cash flow interest rate

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

risk. The Group's global risk management programme focuses on uncertainty in the financial markets and aims to minimise potential adverse effects on the Group's profits.

Risks are managed by the Group's finance management in accordance with policies approved by the Governing Body. This department identifies, evaluates and mitigates financial risks in close collaboration with the Group's operational units.

Credit risk

The credit risk is that which arises as a result of the breach or non-payment of the counterparty in a financial transaction.

Due to its activity, geographic distribution and to the particular characteristics of its customers given the sector in which it operates, the Group does not have significant concentrations of credit risk. In spite of this, the Group has implemented a credit risk control procedure, monitored by a Committee that furthermore evaluates exposure to certain transactions.

On the other hand, the Group policy for financial asset investments is to maintain the availability of their liquidity for use. These balances are maintained in top-tier financial institutions.

The tables below show the ageing of financial assets at 31 December 2023 and 2022:

	2023					Total
	Thousands of Euros					
	Less than 1 month	1-3 months	3 months - 1 year	1-5 years	More than 5 years	
Trade and other receivables, fixed rate	8,742	29,066	49,827	6,482	3,522	97,639
Other financial assets	3	-	101	-	1,732	1,836
Total assets	8,745	29,066	49,928	6,482	5,254	99,475

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	2022					Total
	Thousands of Euros					
	Less than 1 month	1-3 months	3 months - 1 year	1-5 years	More than 5 years	
Trade and other receivables, fixed rate	8,508	31,832	23,411	6,596	1,303	71,650
Other financial assets	9	-	101	-	1,553	1,663
Total assets	8,517	31,832	23,512	6,596	2,856	73,313

Liquidity risk

The Group applies a prudent policy to cover its liquidity risks, based on having sufficient cash and available financing through credit facilities committed to covering the operating and financial needs of the Group.

The goal of the Group's finance management is to maintain flexible financing through the availability of the credit facilities contracted. To cover any operating needs that may be necessary, it maintains credit facilities in the amount of Euros 300,000 thousand available at 31 December 2023 (Euros 375,000 thousand available at 31 December 2022, see Note 21) which, together with cash and cash equivalents (Euros 92,302 thousand in 2023 and Euros 81,102 thousand in 2022) and the current cash flow generation, cover the operating needs of the Group.

Details of the Group's exposure to liquidity risk at 31 December 2023 and 2022 are shown below. The tables reflect the analysis of financial liabilities by contractual maturity date.

(24) Provisions for Employee Benefits

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

Details of provisions for employee benefits and their classification as current and non-current are as follows:

	Thousands of Euros	
	2023	2022
	Non-current	Non-current
Benefit obligations	118	118
Total	118	118

(a) Post-employment and long-term employee benefits

Under the current pension scheme, certain Group employees still hold the rights acquired through the pension scheme of the group to which the Parent previously belonged. This scheme provides defined contribution plans for retirement, for which insurance policies have been arranged for cover the Plan. d.

On the other hand, the social benefit obligations for deferred remuneration commitments in the form of length-of-service and retirement premiums are covered by internal provisions.

At 31 December 2023 and 2022 obligations with employees provisioned with internal funds correspond to long-service bonuses for serving personnel.

Details of and movement in provisions for long-term employee benefits are as follows (thousands of Euros):

	Other long-term employee benefits	
	2023	2022
Balance at 1 January	118	132
Personnel expenses	-	5
Actuarial gains and losses	-	(19)
Balance at 31 December	118	118

The contributions made by the Group to the pension plan amounted to Euros 666 thousand in the year ended 31 December 2023 and are included under personnel expenses in the Consolidated Income Statements (Euros 638 thousand in the year ended 31 December 2022, Note 31).

At 31 December 2023 and at 31 December 2022, no accrued contributions were pending.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

(25) Other provisions

Movement in other provisions in 2023 and 2022 was as follows:

	Thousands of Euros	
	2023	2022
Balance at 1 January	3,073	2,290
Charges	3,052	622
Payments	(121)	(33)
Reclassifications	(584)	247
Applications	(8)	(53)
At 31 December	5,412	3,073

These provisions mainly include measurement differences in the distribution and transmission activity pending settlement, several lawsuits and provisions to dismantle facilities and contingent payments for business combinations carried out during the year.

Guarantees

The Group has extended guarantees to various government bodies totalling Euros 46,475 thousand at 31 December 2023 (Euros 51,185 thousand at 31 December 2022) to ensure compliance with its obligations as a company officially authorised to distribute gas in a number of municipalities and to carry out works on public thoroughfares. The Group does not expect any significant liabilities to arise from these guarantees.

(26) Environmental Information

The Group is aware of its responsibility to protect the environment and has undertaken a number of initiatives with this purpose within its area of influence. The Group conducts its activities in full compliance with prevailing environmental legislation.

The Group renders an important energy advisory service to its customers, including active participation in campaigns to replace other energies with natural gas, as well as supporting and facilitating the renewal of facilities, with consequent improvements in energy efficiency and reductions in pollutant emissions.

When so required by law due to the characteristics of the project in question, the Group commissions mandatory reports by independent environmental consultants when carrying out network extension works, and recognises the related costs as an increase in the value of the investment.

(27) Government grants and other liabilities

Movement in non-refundable government grants and other liabilities is as follows:

2023
Thousands of Euros

REDEXIS, S.A.U. AND SUBSIDIARIES

(34) Information on the Members of the Parent Company's Board of Directors and the Group's Senior Management Personnel

At 31 December 2023 the Parent's Board of Directors comprised eight members: one woman and seven men. Subsequently, in February 2024, the Parent Company changed its management body by establishing two joint directors.

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

Given their status as members of the Board of Directors, no remuneration has been generated in 2023 or 2022 or payables or receivables under that provision, with the exception of the remuneration resolved in favour of non-executive Presidents, pursuant to the resolution of the Parent Company's General Shareholders Meeting and Board of Directors in 2023. However, remuneration is paid to board members who perform executive duties in the Company.

In 2023, the board members, whether executive or not, and other directors who report directly to the board members received remuneration amounting to Euros 3,159 thousand for 12 recipients (15 recipients received Euros 4,025 thousand in 2022), which includes the settlement of the bonus accrued in 2022.

In 2022 a long term incentive plan was implemented for certain executives for the 2022-2026 period, inclusive.

According to the best estimate of management within the current context, no amount whatsoever has been provisioned as regards the new long-term incentive plan for 2023.

The Group also has pension and life insurance obligations with its executive board members and other directors who report directly to the Board of Directors. In this respect, the Group incurred expenses of Euros 154 thousand for 11 recipients in 2023 (Euros 156 thousand for 13 recipients in 2022).

The amount of civil liability insurance premiums for damages caused by acts or omissions of Directors and senior management personnel in the exercise of their posts came to Euros 37 thousand in 2023 (Euros 30 thousand in 2022).

No advances or loans were granted in 2023 or 2022 to board members or other directors who report directly to the Board of Directors, nor were any guarantees extended on their behalf.

In 2023 and 2022 neither the members of the Board of Directors of the Parent nor other directors who report directly to the Board of Directors carried out any transactions other than ordinary business or applying terms that differ from market conditions with the Parent or any other Group company.

The members of the Board of Directors of the Company and their related parties have had no conflicts of interest requiring disclosure in accordance with article 229 of the Revised Spanish Companies Act.

(35) Audit Fees

Deloitte, S.L., the auditor of the Group's annual accounts, accrued the following fees for professional services during the years ended 31 December 2023 and 2022:

REDEXIS, S.A.U. AND SUBSIDIARIES

Notes to the Consolidated Annual Accounts

	Thousands of Euros	
	2023	2022
Audit services	258	245
Other audit-related services	-	9
	258	254

The amounts detailed in the above table include the total fees for services rendered in 2023 and 2022, irrespective of the date of invoice.

Other companies affiliated with Deloitte invoiced the Group the following fees and expenses for professional services during the years ended 31 December 2023 and 2022:

	Thousands of Euros	
	2023	2022
Other services	41	200
	41	200

(36) Events after the Reporting Period

- On 16 January 2024, the Parent Redexis, S.A.U. distributed a dividend to its sole shareholder Redexis, S.A., charged to distributable reserves, amounting to Euros 46,000 thousand, the purpose of which is, among others, to carry out the necessary corporate reorganisation within the regulatory framework governing the energy sector in Spain and its regulated and non-regulated activities.
- On 23 January 2024, the company Redexis Gas Servicios, S.L.U., a subsidiary of the company Redexis, S.A.U., acquired 100% of the share capital of the operating company GV Ecogest, S.L. (renamed Biored Los Alcáceres, S.L.U. from February 2024), which is mainly engaged in the management and treatment of organic, biodegradable, non-hazardous waste for the generation of biogas.
- On 16 February 2024, Redexis Gas Servicios, S.L.U., a subsidiary of the group company Redexis, S.A.U., sold all its ownership interests in 10 companies engaged mainly in the management of non-hazardous waste and biogas production, as well as the sale of all its ownership interests in 1 company engaged in the management and production of hydrogen, among other activities. The purchaser of all the shares owned by Redexis Gas Servicios, S.L.U. in the 11 companies indicated above was the Redexis Energía group company Redexis Renovables, S.L.U., which was incorporated on 23 January 2024 as part of the corporate reorganisation indicated in the first paragraph of this note and in Note 4.

APPENDIX II

Alternative performance measures (APM)

The Redexis Group financial information contains magnitudes and measures prepared in accordance with applicable accounting regulations, as well as others prepared in accordance with reporting standards established and developed internally, which are known as Alternative Performance Measures (APMs).

These APMs are considered magnitudes adjusted with respect to those presented in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU), which is the applicable accounting framework for the consolidated financial statements of the Redexis Group, and should therefore be considered by the reader as supplementary but not replacing these, which should be read, interpreted and reviewed overall and not separately.

These additional financial measures deriving from the consolidated accounting records are not financial or liquidity performance measures of the Group according to the IFRS, and should not be considered as an alternative to consolidated net income; or as an indicator of Group performance; or as an alternative to cash flows from operating activities; or as a measure of Group liquidity. Therefore, they may differ from measures with similar titles reported by other companies and may not be comparable.

The Redexis Group reports these APMs to help users of financial information to understand its financial performance, since these constitute additional financial information and the Group considers that they represent useful alternative and additional indicators of the financial performance of the Group when read or interpreted together with the financial statements.

These APMs are consistent with the main indicators used by the community of investors and analysts in capital markets. To this regard, and in accordance with the contents of the Guidelines issued by the European Securities and Markets Authority (ESMA), in force since 3 July 2016 relative to the transparency of Alternative Performance Measures, the Redexis Group provides the following information deemed significant relative to those APMs included in the 2021 management information.

1. EBITDA

Acronym for “Earnings Before Interest, Tax, Depreciation and Amortisation”. This is an indicator of the results from operating activities of the Group, before deducting net interest, corporate income tax, depreciation and amortisation and prior to possible adjustments for non-recurring items relative to remuneration from gas transmission from previous years, possible non-recurring organisational restructuring and/or personnel expenses, other non-recurrent operating expenses or non-current asset impairment.

2. EBIT

Acronym for “Earnings Before Interest and Taxes”: indicator that measures the results from operating activities of the Group before deducting interest and corporate income tax.

3. EBT

Acronym for "Earnings Before Taxes": indicator that measures the results from operating activities of the Group before deducting corporate income tax.

4. EBITDA margin

EBITDA figure of the total operating income and other revenue.

5. EBITDA margin less the dilutive effect of the LPG

The EBITDA figure of the total operating income and other revenue, after deducting the cost of the LPG from these, so as to show the net margin of the LPG in the income as remuneration, in the same way as the natural gas distribution and transmission business.

6. Total income and other operating income

Total income and other operating income plus the work carried out by the company for its fixed assets.

7. Personnel expenses

Expenses for salaries and wages and other employee benefit expenses, without including non-recurrent expenses relative to organisational changes or other non-recurrent expenses.

8. Capital / Investment Expenses

Capital used in additions of non-current tangible assets, such as PPE (property, plant and equipment) including outlays for the acquisition of subsidiaries or business units and including additions of non-current intangible assets.

1. Position of the company

1.1. Organisational and corporate structure

Redexis S.A.U., is the parent company of the Redexis group of companies (hereinafter "Redexis"), dedicated to the development of gas and renewable energy infrastructures such as hydrogen or biomethane. Its networks provide access to many residential, industrial and service sector customers.

At the end of 2023, a process of corporate reorganisation was begun in order to provide itself with a new organisational structure for the development of the future renewable gas production business, separating the regulated activities of natural gas transmission and distribution, and complying with the provisions of Article 63 of the Hydrocarbon Law 34/1998, of 7 October. As a result of this corporate reorganisation, the shares of Redexis, S.A.U. are now wholly owned by its Parent company Redexis Energía, S.A., which is therefore the sole shareholder of Redexis, S.A.U., which has become a single-member company.

In the first quarter of 2024, the corporate reorganisation process continued, with the incorporation in February 2024 of Redexis Renovables, S.L.U., a single-member company wholly owned by its parent Redexis Energía, S.A.U., the sole shareholder. In addition, the companies that will be dedicated to the production of renewable gases in the future were transferred to Redexis Renovables, S.L.U.

The companies comprising Redexis at year-end 2023 and February 2024 are listed below.

Companies comprising Redexis at year-end 2023 and February 2024

- Redexis, S.A.U: Head of the Group engaged in the distribution and transmission of all types of gas and oil-based products for domestic, commercial and industrial purposes, the use of any by-products, and activities related with the above.
- Redexis Infraestructuras, S.L.U. devoted to the regasification of liquefied natural gas, natural gas transmission and storage and related and ancillary activities. It is 100% owned by Redexis S.A.U.
- Redexis GLP, S.L.U. is devoted to the retail sale and supply of liquefied petroleum gas. It is 100% owned by Redexis S.A.U.
- Redexis Gas Murcia, S.A. is devoted to the distribution and secondary transmission of natural gas, and the distribution and sale of liquefied petroleum gas through pipelines. It is 99.98% owned by Redexis S.A.U.
- Redexis Gas Services, S.L.U. is devoted, among others, to the planning, analysis, project, execution, assembly and operation of infrastructures, in addition to the management, advisory and corporate services linked to the energy sector. It is 100% owned by Redexis S.A.U.
- Eficiencia y Red Solar, S.L., devoted to the carrying out of energy activities and, specifically, the production, storage and marketing of energy from renewable sources, such as photovoltaic facilities, through of by means of the corresponding facilities, of its own or of third parties. 75% owned by Redexis Gas Servicios, S.L.U. Since its creation, the company has not been active.

Companies comprising Redexis at year-end 2023, transferred to Redexis Renovables in 2024

- Biored Arévalo, S.L.U., mainly engaged in the construction and operation of a waste management and biomethane production plant. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Bajo Cinca, S.L.U., mainly engaged in the construction and operation of a waste management and treatment and biomethane production plant. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Ejea, S.L.U., mainly engaged in the construction and operation of a waste management and treatment and biomethane production plant. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Cuellar, S.L.U., mainly engaged in the construction and operation of waste management and treatment and biomethane production plants. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Medina del Campo, S.L.U., mainly engaged in the construction and operation of waste management and treatment and biomethane production plants. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Calatayud, S.L.U., mainly engaged in the construction and operation of waste management and treatment and biomethane production plant. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Alcores, S.L.U., mainly engaged in the construction and operation of waste management and treatment and biomethane production plants. 100% owned by Redexis Gas Servicios, S.L.U.
- Biored Cella, S.L., mainly engaged in the construction and operation of waste management and treatment and biomethane production plant. 75% owned by Redexis Gas Servicios, S.L.U. Entity related to Redexis and included in the scope of consolidation at the end of 2023.
- Biored Vegas Altas, S.L., mainly engaged in the construction and operation of a waste management and treatment and biomethane production plant. 75% owned by Redexis Gas Servicios, S.L.U. Entity related to Redexis and included in the scope of consolidation at the end of 2023.
- Galivi Solar, S.L.U. (called Biored Lorca S.L.U. since February 2024), mainly dedicated to the operation of waste management and treatment plants and the production of biogas and biomethane. 100% owned by Redexis Gas Servicios, S.L.U.
- H2Duero, S.L., mainly engaged in the construction and operation hydrogen production plants. 80% owned by Redexis Gas Servicios, S.L.U. Entity related to Redexis and included in the scope of consolidation at the end of 2023.
- Energygreen Gas Almazan, S.L., mainly engaged in the operation of non-hazardous waste management and treatment and biomethane production plants. 70% owned by Redexis Gas Servicios, S.L.U. Entity related to Redexis and included in the scope of consolidation at the end of 2023.

In addition, there are three entities linked to Redexis:

- Redexis Energía, S.A. is the parent company of Redexis, S.A.U., which engages in holding activities, including the provision of services for its group companies.
- Redexis Gas Finance, B.V., a company devoted to debt issuance on capital markets. It has the same shareholders, and in the same percentage as Redexis, S.A.

- The Redexis Foundation is an entity devoted to the promotion of technological innovation aimed at energy transition, to enhance social work and promote the development of local communications through social, cultural, informative and sports projects.

1.2. Activity

Redexis is an energy infrastructure group devoted to the activities of natural gas transmission and distribution, distribution and supply of liquefied petroleum gas (LPG) and promotion and development of renewable energies, such as biomethane and hydrogen.

The Group develops and operates infrastructures to transmit natural gas from the main transmission networks in Spain to the points of consumption in homes, businesses, industries and service stations.

Redexis is fully committed to society and the environment. As a comprehensive energy infrastructure company, it seeks to maximise growth and efficiency, contributing decisively to sustainable development, being responsible with the environment and generating value for its stakeholders.

The Group is conscious of the importance of the energy transition and its role in a sustainable future. To do so, it promotes projects in order to position itself as a leader in the development of renewable infrastructures promoting clean and renewable energies such as hydrogen, biomethane or photovoltaic energy. Therefore, in addition to expanding the infrastructures to make gas accessible, the Group promotes a future in which a sustainable energy source circulates through its networks, taking advantage of the opportunities for a circular and cleaner economy.

1.2.1. Key indicators

With nearly 773 thousand supply points and a volume of distributed energy of 31TWh, Redexis gives access to a sustainable and efficient source of energy, natural gas and LPG, serving 929 municipalities in 39 provinces through more than 12,000 kilometres of its own energy infrastructure. It operates in the Autonomous Regions of Aragón, Andalusia, the Balearic Islands, Castilla-La Mancha, Castilla y León, Catalonia, the Region of Madrid, Valencia, Extremadura, Navarra, La Rioja and Murcia. The Group has already developed a network of 28 refuelling stations in service nationwide that provide access to a competitive and low-emission mobility alternative. Almost 90% of Redexis activity is regulated and aimed at providing an optimal, safe and efficient service to residential, industrial and transmission users.

In 2023, Redexis continued its expansion plan, adding around 22,000 new supply points (3 thousand new points), new tertiary and industrial demand and delivering two biomethane injection points to existing networks and the 73 new kilometres of distribution networks deployed in the year.

4.

Operating data	2023	2022	% Var.
Connection points	772,906	769,955	0.4%
Natural gas (NG) P<4bar	656,031	651,568	0.7%
LPG (*)	116,537	116,258(*)	0.2%
Natural gas (NG) P>4 bar	338	343	(1.5%)
Provinces served	39	39(*)	(0.0%)
Municipalities served(*)	929	899(*)	3.3%
Length of the network (km)	12,132	12,058	0.6%
Distribution network (km)(*)	10,486	10,413	0.7%
Transmission network (km)	1,645	1,645	0.0%
Power distributed (GWh)	31,089	28,893	7.6%

(*) The figures in the table include the points integrated at the end of each period. In 2022, there were 2,407 supply points pending integration in 83 municipalities.

From a financial point of view, the Group closed 2023 with revenues of Euros 260.5 million and a consolidated EBITDA of Euros 162.3 million, with an EBITDA margin of 62.3% (70.6% if the net margin of LPG is included in Revenues).

Financial information	2023	2022	% Var.
<i>Figures in millions of Euros, except where indicated</i>			
Income	260.5	269.4	(3.3%)
Distribution – regulated	104.6	106.7	(2.0%)

Transmission – regulated	52.4	59.1	(11.3%)
Regulated LPG business	39.9	38.6	3.4%
Other operating income	22.3	21.6	3.2%
Self-constructed non-current assets	14.4	14.3	0.7%
EBITDA	162.3	170.3	(4.7%)
<i>EBITDA margin</i>	<i>62.3%</i>	<i>63.2%</i>	<i>(0.9 p.p.)</i>
<i>EBITDA Margin (with net LPG margin in revenue)</i>	<i>70.6%</i>	<i>71.4%</i>	<i>(0.8 p.p.)</i>

1.2.2. Activities

(a) Distribution

The Group builds, operates and maintains the distribution facilities to supply natural gas to different municipalities in Spain and gives new users access to gas. This activity is regulated.

At the close of 2023, Redexis has 656,031 natural gas supply points and a distribution network spanning 9,035 km distributing natural gas to 273 municipalities in Spain, with the addition of four new municipalities in Andalusia with regard to 2022.

Redexis has developed a network of 28 refuelling stations of real national scope: 12 LNG stations for long-distance heavy traffic that cover the country's main traffic corridors, 12 CNG stations that provide service for transport fleets such as the public bus service of Transporte de las Islas Baleares (TIB), or the ambulance service in Murcia; and 4 CNG stations open to

the general public in the main Spanish cities.

In addition, in 2023, Redexis has delivered two biomethane injection points to its distribution networks in Soria and Murcia.

Redexis continues to invest in R&D for more efficient and safer activity. Thus, Redexis moved forward this year in new initiatives for robotisation and adaptation of the networks to renewable gas. Likewise, it uses artificial intelligence algorithms which make it possible to expand the network more efficiently, optimising contracts, and improving levels of security and the quality of supply.

(b) Transmission

The Group operates and maintains its own network of gas pipelines, supplying natural gas to the areas in which consumption is most concentrated. This activity is regulated.

At the end of 2023, Redexis had a network of 1,645 km, comprising 51 gas pipelines and transmitting gas at pressures exceeding sixteen bars to industrial hubs and connections with distribution networks.

(c) Liquefied Petroleum Gas (LPG)

The Group distributes and sells liquefied petroleum gas (LPG), a regulated activity subject to the regime provided by Title IV of Hydrocarbon Law 34/1998.

The LPG business complements the natural gas distribution business, enabling Redexis to capitalise on growth opportunities in areas where it is not feasible to extend its distribution network, and to provide its end customers with an optimised high-quality service that is secure and efficient.

Redexis currently has 116,000 LPG points and more than 1,400 km of network in 852 municipalities nationwide.

Building on its experience, Redexis converts these LPG supply points into natural gas points. These conversions take place gradually, taking into account technical and regulatory criteria.

1.3. Business model and strategy

The Group has a strategic plan aimed at boosting and developing energy infrastructures to speed up the energy transition in Spain, fully aligned with the Integrated National Energy and Climate Plan 2021-2030 (PNIEC) published by the Spanish Government as part of the European strategy to attain carbon neutrality by 2050.

This plan revolves around three main axes:

1. Develop and operate gas infrastructures efficiently, adapting them to renewable gases.
2. Promote renewable gas projects, in particular biomethane and hydrogen, facilitating their injection into gas networks.
3. Provision of integral energy solutions to support our customers in meeting their energy efficiency goals to attain energy efficiency, reduced emissions and increased competitiveness.

Sustainability (ESG) is an integral part of the Redexis' strategy, which seeks to attain the following sustainable development goals:

- Reduce the direct carbon footprint (scope 1 and 2) and offset total emissions (scope 3).
- Develop local and regional economies and create employment.
- Make progress with social goals through the Redexis Foundation
- Increasing the importance of ESG-based objectives and increased Corporate Governance monitoring activities.
- Increase the presence of women in executive and management positions, developing specific plans.

Redexis wagers for sustainable growth, aimed at a more sustainable and efficient business model. To this end, the pillars on which the activity are based are balanced and sustainable growth, focused on businesses that provide long-term security, stability and visibility.

- Operational excellence, focusing on customer satisfaction.
- Innovation, by means of the use of the most advanced technology to obtain greater efficiency.
- Proactive risk management based on prevention and anticipation.
- Creation of value for society and stakeholders.
- Respect for and conservation of the environment.
- People: key to the development of Redexis.
- Financial stability based on a prudent financial policy in which any investment should be financially sustainable, and that is reflected in the Redexis' commitment to maintain an investment grade credit level.
- Sustainability in all economic, social and environmental spheres.

2. Business evolution and results

2.2. Key milestones in 2023

The most significant events of Redexis during the year are detailed below:

Corporate structure

- Redexis has begun the process of corporate reorganisation in order to provide itself with a new organisational structure for the development of the future renewable gas production business, separating the regulated activities of natural gas transmission and distribution, and complying in advance with the provisions of the hydrocarbon law on the separation of regulated activities and the production of renewable gases.
- Incorporation of Redexis Energía, S.A., becoming the holding company of the Redexis Energía Group and sole shareholder of Redexis, S.A.U.

Credit rating and sustainability

- Standard & Poor's (S&P) credit rating agency reaffirms Redexis' investment credit quality, maintaining its BBB- rating with a stable outlook.
- GRESB, the worldwide Sustainability benchmark, awarded Redexis with the maximum of five stars for the fifth consecutive year for its performance in ESG (Environmental, Social and Governance) for a total of 95 points out of 100.
- The Sustainability Index and RSC Moody's ESG Solutions (formerly Vigeo Eiris), maintained Redexis at the highest rating of "Advanced" in ESG, an above average rating in the sector.

Business development

- Redexis continues to promote the development of gas infrastructures prepared for renewable gases, investing Euros 70 million to connect new residential and industrial users and to develop and inject renewable gases into its networks.
- Redexis reaches 772,906 supply points, extending its presence in Spain, serving 929 municipalities in 39 provinces.
- In the natural gas vehicle business, Redexis closed 2023 with 28 refuelling stations developed throughout Spain.

Renewable gases: biomethane and hydrogen

- Redexis receives around 250 project applications for the injection of biomethane into its networks, with an injection point in Soria being commissioned in April 2023 and the construction of an injection point for a plant in Murcia nearing completion.
- Redexis finishes the construction of its first biomethane injection point in Ólvega (Soria) as part of the Biolvegas project of construction of a biogas plant for the recovery of municipal waste. Since April 2023, the plant has injected biomethane into its networks and plans to inject 38 GWh of biomethane per year, equivalent to the annual natural gas consumption of more than 8,100 homes or 25% of all the gas consumed in the municipality.
- Redexis finishes the construction of a biomethane injection facility to connect the Galivi Solar biogas plant in Lorca (Region of Murcia) into its distribution network. The injection of around 40 GWh of biomethane per year is planned.
- 9 project companies have been set up for the promotion and processing of biomethane production plants: Biored Arévalo S.L.U., Biored Bajo Cinca S.L.U., Biored Ejea S.L.U., Biored Cuellar S.L.U., Biored Medina del Campo S.L.U., Biored Calatayud S.L.U., Biored Alcores S.L.U., Biored Cella S.L., Biored Vegas Altas S.L., Biored Alcores S.L.U., Biored Cella S.L., Biored Vegas Altas S.L. These companies will be transferred to Redexis Renovable, S.L.U. in the first quarter of 2024.
- Three companies that own three agro-industrial waste treatment plants have been acquired to start producing biomethane in the future from the biogas obtained in the waste treatment process: Energygreen Gas Almazán S.L. (Soria), Galivi Solar S.L. (Murcia) and GV Ecogest S.L. (Murcia). These companies will be transferred to Redexis Renovable, S.L.U. in the first quarter of 2024. In February 2024, the

companies Galivi Solar S.L.U. and GV Ecogest S.L.U. will be renamed Biored Lorca S.L.U and Biored Los Alcáceres S.L.U., respectively.

- Redexis is building a 2.5 MW green hydrogen production plant in Garray (Soria) for Somacyl (a public company of the regional government of Castilla y León specialising in renewable energy and energy efficiency projects).
- H2 Duero, S.L., a joint venture between Redexis and Somacyl, was created for the future operation of the first green hydrogen production plant in Castilla y León in Garray (Soria). It will produce 300 tonnes of hydrogen to supply the industrial and mobility sector. This company will be transferred to Redexis Renovable, S.L.U. in the first quarter of 2024.
- Redexis has been awarded more than Euros 20 million in funding from the IDAE (Institute for Energy Diversification and Saving, a body attached to the Spanish Ministry for Ecological Transition and the Demographic Challenge, through the Secretary of State for Energy) for the development of two hydrogen projects: H2 BCN Hub in Barcelona and Aira H2 in Seville.
- Redexis reached an agreement with Iberostar for the installation of a green hydrogen fuel cell for cogeneration at the Iberostar Bahía de Palma hotel in Mallorca. This fuel cell will supply more than 70% of the hotel's thermal consumption, with an estimated consumption of 10 tonnes of green hydrogen. This agreement arises from the Green Hysland project, financed by the European Commission for the supply of green hydrogen on the island of Mallorca (Balearic Islands), for which Redexis has been responsible, among other things, for the construction of a hydrogen pipeline infrastructure.

Foundation and sponsorships

- The Foundation has made two donations to the Emergency Committee, the first to alleviate the effects of the earthquake in Syria and Turkey and the second to help in the humanitarian emergency caused by the earthquake in Morocco.
- Launch of phase III of the Assistance Line for welfare projects that help improve the quality of life of at-risk groups, with a special focus on the improvement of energy efficiency and quality of life.
- Redexis has renewed its sponsorship of the UCAM Murcia basketball club.
- Planting and reforestation of a plot of land in the province of Zaragoza, in collaboration with "El Bosque de los Zaragozanos", in which Redexis employees and their families participated.
- Financial support in outreach projects via the Aragon Hydrogen Foundation for doctoral theses, master degree's final projects and dissertations to promote research in hydrogen as an energy vector.
- Launching of the "Energía 26" study grants for the children of Redexis employees undergoing baccalaureate studies, intermediate/higher vocational training or bachelor's degree studies in the 2023/2024 academic year, with the aim of encouraging and recognising academic effort and promoting development in the educational sphere.

Environment and safety

- The ISO 14001 certifications are verified: 2015, environmental management system; the ISO 50001: 2018, energy management system, the ISO 45001: 2018; the occupational health and safety management system, and the ISO 50001:2018 transmission, storage and distribution of natural gas and liquefied natural gas (LNG) and liquefied petroleum gas (LPG).
- In December 2023 the Group recorded its carbon footprint, passing the greenhouse gas verification of the Company's Scopes 1, 2 and 3 with no reservations and with the declaration of a positive opinion, in compliance with ISO 14064, by an external and independent entity.

d.

2.3. Analysis of results

Key indicators:

Key financial indicators	2023	2022	Var.	%
Figures in millions of Euros				
Regulated revenues	223.9	233.6	(9.7)	(4.2%)
Regulated distribution revenue	104.6	106.7	(2.1)	(2.0%)
Other regulated distribution revenue	27.1	29.2	(2.1)	(7.2%)
Regulated transmission revenue	52.4	59.1	(6.7)	(11.3%)
Regulated LPG business	39.9	38.6	1.2	3.4%
Other operating income	22.3	21.6	0.7	3.2%
Self-constructed non-current assets	14.4	14.3	0.1	0.7%
Total Income	260.5	269.4	(8.9)	(3.3%)
Supplies	(43.8)	(46.2)	2.4	(5.2%)
Employee benefits expense	(26.9)	(25.8)	(1.1)	4.3%
Other recurrent operating expenses	(27.5)	(27.1)	(0.4)	1.5%
EBITDA	162.3	170.3	(8.0)	(4.7%)
Other non-recurrent operating expenses	0.6	(0.7)	1.3	(185.7%)
Impairment losses on non-current assets	(1.0)	(1.0)	(0.1)	0.0%
Depreciation and amortisation	(103.3)	(100.8)	(2.5)	2.5%
Earnings before interest and taxes (EBIT)	58.6	67.8	(9.2)	(13.6%)
Finance profit/loss	(35.5)	(29.2)	(6.4)	21.6%
Earnings before tax (EBT)	23.0	38.6	(15.6)	(40.4%)
Income tax (expense)/revenue	(5.4)	(10.2)	4.9	(47.1%)
Profit/loss for the year	17.7	28.4	(10.7)	(37.7%)

Note 1: Redexis Group revenues comprise the remuneration it receives from the gas system for its transmission and distribution activities, as awarded by the national regulatory authorities.

Redexis' revenues amounted to 260.5 million, 3.3% less than in 2022, achieving an EBITDA of 162.3 million.

The evolution of revenues is partly due to the 2021-2026 regulatory framework and has been mitigated by the growth in connection points and the favourable evolution of industrial demand and the LPG business.

In the residential sector, gas volumes continued to be conditioned by abnormally warm temperatures, resulting in two consecutive very warm winter seasons. Redexis continued to grow in the residential segment, connecting 22,000 new supply points to its networks.

In the industrial sector, the normalisation of gas prices coupled with growth investments in this segment have led to a 20% increase in volumes compared to 2022. Likewise, the level of contracting remains above 1.1 TWh, exceeding forecasts for the industrial and tertiary segment.

3. Liquidity and capital resources

3.2. Debt structure

The Group conducts a prudent management of the liquidity risk ensuring compliance with the payment commitments acquired, trade as well as financial, covering funding needs by means of the recurring cash generation from its businesses, as well as the contracting of long-term loans and credit facilities.

In these past few years, Redexis has proven its ability to access capital markets by means of bank facilities, bond issues and loans with the EIB.

At 31 December 2023, Redexis has liquidity in the amount of Euros 392.7 million, according to the following breakdown:

Liquidity analysis (in € m)				
Type	Total	Drawn down	Available	
Sustainable revolving credit facility	300.0	-	300.0	
Cash and cash equivalents	92.7	-	92.7	
Total	392.7	-	392.7	

The debt structure of the Group is as follows:

Debt structure (in € m)					
Type	Total	Drawn down	Available	Maturity	
Loan with the European Investment Bank	122.3	122.3	-	2036	
Loan with the European Investment Bank	47.1	47.1	-	2039	
Loan with the European Investment Bank	75.0	75.0	-	2040	
Debt with related parties (*)	500.0	500.0	-	2025	
Debt with related parties (*)	500.0	500.0	-	2027	
Sustainable bank loan	225.0	225.0	-	2027-2029	
Sustainable revolving credit facility	300.0	-	300.0	2024-2026	
Sustainable revolving credit facility	3.7	3.7	0.0	2024-2027	
Total Gross Debt	1,773.1	1,473.1			
Cash and cash equivalents		92.7			
Net Debt		1,380.4			

(*) Loans with Redexis Gas Finance, B.V., devoted to the issue of debt, and that are related to the issue of bonds by Redexis Gas Finance, B.V. with the guarantee of Redexis, S.A.

In June 2023, the Group company Redexis, S.A.U. unilaterally waived its right to draw down the Euros 75,000 thousand available under the Term Loan financing arranged in June 2022, leaving Euros 225,000 thousand actually drawn down. Redexis has no

relevant short term maturity, and has sufficient liquidity and financial resources to ensure its growth, address its future investments and its financial commitments.

3.3. Credit rating

On 27 September 2023 the credit rating agency Standard & Poor's prepared the annual report for Redexis, S.A., which maintained its BBB- rating with a stable outlook and investment grade category.

At year-end, there has been no update.

Note: the ratings may be reviewed, suspended or withdrawn by the rating entity at any time.

4. Events after the reporting period

Events after the year end are described in Note 36 to the Consolidated Annual Accounts.

5. Information on outlook

Natural gas represents about 25% of national energy consumption and is an essential source of energy for the Spanish economy. More than 8 million homes use this source of energy and in the tertiary and industrial sector, gas accounts for around 30% of energy consumption. Gas is a competitive, low-emission energy source and contributes to the sustainability and economic viability of homes, businesses and industries. d.

The role of gas infrastructures is essential in energy transition and for the development of a circular economy based on energy vectors that depend less on non-renewable sources and that promote the management of agricultural and urban waste, such as biomethane and hydrogen. This is established in the National Integrated Energy and Climate Plan '21-30 (PNIEC) and the Decarbonisation Strategy to 2050 prepared by the Spanish Government within the scope of the Law on Climate Change and Energy Transition and which are aligned with the European Green Deal. In addition, biomethane and hydrogen roadmaps have been prepared, along with specific regulation to guarantee the origin of biomethane to chart the path toward the development of these energy sources.

The Spanish gas infrastructure is consistent to the development of renewable gases without the need for additional major investments, making it relatively easy to diversify supply sources, increasing and improving the security of supply to Spanish homes and industries.

Numerous projects are currently being developed in Spain for the production of renewable gases and their injection into the gas networks. Green hydrogen and biomethane are recognised as energies that contribute to achieving the European Commission's carbon neutrality objectives, and the different European programmes include aid for the development of these renewable energies.

Redexis, in its firm commitment to sustainability, facilitates the injection of renewable gases into its networks and the access of residential, industrial and mobility customers to carbon neutral gases.

As a benchmark energy infrastructures company, leader in efficiency and firmly committed to its users, employees and shareholders, Redexis wagers for a move toward a more sustainable and efficient business model to address the new challenges facing the energy sector.

6. Main risks associated with Redexis activities

Just like any other company or group of operating companies, the Group is exposed to several risks inherent to the sector, to the markets in which it operates and to the activities it performs that, were they to materialise, could prevent the attainment of its objectives and the successful execution of its strategies.

The Group has opted for a control and risk management model that makes it possible to adapt to the economic context and to the business activity of the Group, in order to be able to respond to any risks that it may face.

The Group has an Audit and Risk Committee whose duty is to oversee activity and risk management, reviewing policies and practices regarding this management, as well as ensuring the ability of the Group to identify new risks and monitor the effectiveness of the Group's risk management. This Committee is composed of 3 non-executive directors of the Group, and reports directly to the Board of Directors.

7. Human resources

At the end of December 2023, Redexis had a total of 327 employees while the average headcount for the year was 340.

8. Own shares

Redexis did not hold any own shares at 31 December 2023, nor did it perform any transactions with own shares during 2023.

9. Financial instruments

The risk management policy is explained in Note 23 to the Consolidated Annual Accounts.

10. Average payment period

The average payment period of the group is 41 days as detailed in note 22 to the Consolidated Annual Accounts.

11. Innovation model

Innovation is one of Redexis' strategic pillars, that allow it to respond to the new challenges and opportunities posed by the energy transition, connecting sustainably with the real needs of society. Redexis has extensive knowledge of gas networks, that allows it to participate in the research and development of several solutions for the transition of networks, analysing the performance of renewable gases first hand, and identifying improvements in efficiency and digitalisation.

All of this has led Redexis to develop business opportunities associated with the energy transition, in segments of mobility, production and injection of renewable gases in the network and the development of infrastructures that make it possible to improve the energy efficiency of our customers.

To promote innovation, Redexis has a specific area of innovation that enables the transversal flow of knowledge throughout all Group activities, so that sufficient resources, knowledge and participation are available in each project for its development. Furthermore, this area is

responsible for the promotion and disclosure of all areas relating to innovation, external as well as internal.

In addition, the Innovation Committee of Redexis is in charge of preparing, tracking and implementing the Innovation strategy throughout all areas of the company, monitoring new ideas and initiatives and technological surveillance and benchmarking as well as implementing the results of the innovation and projects.

Redexis invests in R+D+i to ensure that these investments flow through all operating segments of the Group, making it possible to accelerate transformation processes with the firm objective of achieving operational excellence and developing new technologies that make it possible to guarantee the security of supply and neutralise carbon emissions, from its own activities as well as those of its customers or suppliers. These investments are addressed from three lines of action:

- Short term: focused on improvements with a direct impact on the Group's business lines, in terms of growth and sustainability, aimed at improving operating efficiency, growth and sustainability.
- Medium term: focused on capturing the value of new business models, such as hydrogen, mobility and renewable gas.
- Long term: focused on monitoring the development of new technologies and paradigms.

The strategic lines of innovation focus on:

- **Digitalisation and efficiency**, so as to be able to improve our current processes/activities and apply them to the new facilities under development.
- **Integration/hybridisation of consumer technologies**, for the purpose of integrating and adapting customer facilities to decarbonisation technologies.
- **Development and integration of renewable gases**, such as biogas and hydrogen, in current and future activities.

The following is a breakdown of the most relevant innovative projects developed in several consortia during 2023:

- ✓ The H2020 HIGGS project, Hydrogen In Gas GridS: a systematic validation approach at various admixture levels into high pressure grids, which launched in 2020 after being chosen in the European H2020 FCH JU programme and whose main objective is to cover gaps in knowledge regarding the impact that different levels of hydrogen mixture may have on the gas infrastructure, its components and its management.
- ✓ The H2020 Green Hysland project, which proposes the deployment of a hydrogen ecosystem on the island of Mallorca including the design and construction of a renewable hydrogen production plant from photovoltaic solar energy for use in mobility, stationary applications (fuel cell and cogeneration with a fuel cell in a hotel) and injection into the natural gas transmission network.
- ✓ The MISIONES OCEANH2 project, for the generation, storage and distribution of offshore green hydrogen, financed by CDTI in the 2019 Misiones Call for Proposals,

that launched in 2020. This is an industrial research project for a generation, storage and distribution plant for green hydrogen from offshore renewable power generation. In this project Redexis will study the various technologies involved in the logistic-technological chain for the transmission, storage and land and/or maritime supply that enable the evacuation and supply of hydrogen produced at sea, and will undertake the corresponding design and integration of optimal solutions.

- ✓ The MISIONES ZEPPELIN project, Research in innovative and efficient technologies for the production and storage of green hydrogen based on the circular economy, financed by CDTI in the 2021 Misiones Call for Proposals, that launched in 2021. In this project Redexis leads the study of various technologies to design a modular plan for production, storage and supply of ammonia from renewable hydrogen, and from the decomposition of ammonia to release that hydrogen.
- ✓ The PRISMA project, Proposal for the implementation of sustainable artificial intelligence to obtain a predictive model for LNG consumption, and its application for the optimisation of processes and decrease of its associated footprint, financed by the Ministry of Industry, Commerce and Tourism in the AEI (Innovative Business Groups) Call for Proposals and that proposes the development of a predictive model for consumption from LNG satellite plants that would involve improving the management of LNG plants by allowing for the detection of previously unknown variables that could affect the evolution of demand, changes in consumption curves of each facility as a result of changes in prior variables at an early stage and enabling the optimisation of the movement of LNG cryogenic tanks to fill the storage tanks, with the subsequent decrease of the associated carbon footprint.
- ✓ CANDHy project: the objective of which is to analyse the compatibility of metallic materials (other than steel) in the gas distribution network in the presence of hydrogen, in order to facilitate its distribution in these networks by blending or using 100% hydrogen-dedicated systems. CANDHy is the continuation of the HIGGS project, whose purpose is to analyse the requirements to be carried out on the gas infrastructure, its components and its management for hydrogen injection in the current networks. CANDHy takes this analysis a step further, by focusing on materials to be used for their adaptation to the use of hydrogen in grids in such a way that tests will be carried out on what has been developed in HIGGS.
- ✓ SHIMMER project: the project seeks to enable greater integration of non-fossil gases and safe management of hydrogen injection in multi-gas networks while strengthening knowledge of the risks and opportunities through the following activities: Study of European gas infrastructures and their operating conditions, network integrity and safety management and flow capacity analysis using a virtual network model.
- ✓ The MODELAMEH2 project aims to study the injection of renewable gases (hydrogen and biomethane) into the natural gas network, covering the entire value chain of the process, from the production and conditioning of gas flows to their final impact on consumers, proposing the digitalisation and automation of the different stages and technologies involved in the process and using CFD models to predict flow patterns.

12. Environmental protection

As a company devoted to the development and operation of energy infrastructures in Spain, Redexis renders an important service to its customers: it places clean energy at their disposal with functional, financial and environmental advantages vis-à-vis other types of fuel.

Additionally, Redexis strives to minimise social costs with regard to environmental aspects and the negative effects that this may cause, undertaking projects that go beyond compliance with legal requirements and other environmental requirements that it voluntarily adopts, involving its suppliers and promoting the responsible use of energy.

The Group strategy maintains its commitment to the protection of the environment. It is one of its pillars and a factor of competitiveness. To be aware of the environmental impact of its operations and to develop a company culture that reduces environmental impact as much as possible is paramount for Redexis.

Redexis considers environmental excellence, energy management and efficiency, security and continuous improvement of working conditions and health protection as essential values of its business culture. This is duly reflected in its Integrated Policy approved by Senior Management.

Redexis reviews its Integrated Management System (IMS) annually to adapt it to new regulatory requirements, as well as for continuous improvement. It is currently adapted to the requirements of ISO 45001:2018 occupational health and safety management system, ISO 14001:2015 environmental management system and ISO 50001:2018 energy management system.

This process involves the implementation of the entire management system, involving greater alignment of the organisational strategy with environmental and energy management, manifesting clear leadership and involvement of Management in this area. This resulted in the establishment of the Leadership Committee on energy management, environment and safety and health.

During 2023, we achieved verification of the certification of our Integrated Management System as well as the extension of the certification scope to refuelling stations and photovoltaic installations with 0 minor non-conformities in ISO 50001:2018. 1 non-conformity less than in ISO 14001:2015 and 1 non-conformity less than in ISO 45001:2018 through 86 days of environmental, energy and carbon footprint verification audits, internal as well as external, to improve the processes.

Redexis maintains scorecards with environmental and energy indicators for monthly measurement and reporting that will allow it to identify improvements in its management.

At the close of 2023, Redexis has the ISO 14001: 2015, environmental management system, the ISO 50001: 2018, energy management system, and the ISO 45001: 2018, occupational health and safety management system in its scope "Development and operation of natural gas transmission and distribution facilities, piped distribution of liquefied petroleum gases, refuelling stations and photovoltaic installations". Furthermore in December 2022 Redexis recertified as a healthy company with a certification score of 90.5 out of 100.

Additionally, in December 2023 the Group recorded its carbon footprint at the the Spanish Ministry for the Ecological Transition and the Demographic Challenge (MITEC), having exceeded between July (regulated sector) and November (non-regulated sector) the greenhouse gas verification of the Company's Scopes 1, 2 and 3 with no reservations and with the declaration of a positive opinion, in compliance with ISO 14064, by an external and independent entity.

The directors of the Group consider that at year end no expenses are likely to be incurred in connection with environmental risks for which provision should be made.

Information regarding the Group's environmental activities is presented in Note 26 to the Consolidated annual Report.

13. Non-financial Reporting Statement

The wording given by Law 11/2018, of December 28, to article 262.5 of the consolidated text of the Capital Companies Law, regarding the management report, indicates that a subsidiary of a group will be exempt from the obligation established in this section if said company and its dependents, if any, are also included in the consolidated management report of another company, prepared in accordance with the content established in this article. Based on the above, the Company makes use of the indicated exemption, with non-financial information included in the consolidated management report of Redexis Energía, S.A. and Subsidiary Companies prepared in accordance with said regulations, which will be filed with the Commercial Registry of Madrid.
